Thread: [64 slot Source Server = \\$0.25](#)

**Black Kat** - July 31, 2010, 4:37 pm

[www.xenonservers.com](http://www.xenonservers.com)

PuPuf

Have fun!

**Cryptic** - July 31, 2010, 5:29 pm

Counter-Strike Source

» Game Slots: 64

» Dedicated CPU Core: No

» Server Priority: Normal

[Edit Configuration]

\$37.00 USD

Oh I see now, you use "PuPuf" as promotional code, you didn't make that clear.

**Black Kat** - August 1, 2010, 2:40 am

PuPuf as the code. If it isnt workin' then I guess they have stopped it.

**Methanity** - August 1, 2010, 3:23 am

Damn, one time discount.

Spoiler ([Click to View](#))Been that, done that

**Imperial Legion Soldier** - August 1, 2010, 10:15 am

FUCK. Its only one time. And you had me excited there.

**Girl Scout of America** - August 1, 2010, 11:46 am

And this was for counter strike?

:(

**Anubis** - August 1, 2010, 12:05 pm

No San Andreas Multiplayer on there??

**Simba™** - August 1, 2010, 12:12 pm

only 1 time? that's sad. And what the heck is PuPuf, i know is the code but wtf is this...

**Girl Scout of America** - August 1, 2010, 12:18 pm

This thread has out lived itself. Maybe it's time for a close.

**Thoth** - August 1, 2010, 12:25 pm

One time deal :(

That sucks

**Perpetual** - August 1, 2010, 1:24 pm

Well, this works. It didn't work at first but I sent a support ticket and they applied the promotional code. In the invoice the code now reads as 'PutPuf'

Anyway, a server for a month for only £0.12's pretty good, even for just a month.

**Black Kat** - August 1, 2010, 4:20 pm

Worked for me guys, sorry you didnt see it soon enough.

**Emporer** - August 1, 2010, 5:58 pm

Damn sucks its a one time thing only xD

**KG1990** - August 1, 2010, 6:48 pm

How did you guys get this? The offer says it worked but then payment is asking for a lot?

**AnarchyFTW** - August 1, 2010, 11:50 pm

yeah lol i did this and got to the checkout and was like um yeah....no way it costs \$216 with 99% off

**Perpetual** - August 2, 2010, 12:31 am

(Aug 1, 2010 01:24 PM)Perpetual Wrote: [\[CITE\]](#) Well, this works. It didn't work at first but I sent a support ticket and they applied the promotional code.

This. It still does work.
