Thread: [Upload.re // File Sharing // Cloud Storage](#)

moohook - February 20, 2018, 11:01 am

Review Upload.re let me know what you think or what you think could be changed to benefit all users. We have been very successful last year. Want this year to be another successful year. Looking at reaching over 1000 registered users.

Definitely get this fixed and this

The font for me looks a bit pixelated I would try cleaning that up like on here

Mac_Tonight - February 24, 2018, 8:01 am

Looks good, isn't filled with malware whenever you try and share a link and has a clean looking UI that's not too complicated to understand

Nachfolger - February 24, 2018, 3:59 pm

Just another upload site. The design is definately nice, especially if you designed it yourself. I didn't look too hard but I didn't see any copywrites.

Domain is bad though. Maybe if the TLD was reversed it would make more sense (upload.er)

Good luck my fam.

1. There's about 10000000 other file hosting sites out there with the same premise as yours.
2. What makes your site any better then the current existing ones?
