Thread: [20xL33t Giveaway | New Members Welcome | Ends May 31st, 2018](#)

Charger - February 20, 2018, 1:52 pm

You're probably a new, non-upgraded member if you are reading this so first of all, welcome to HackForums!

I'm sure you are here because of the title and want a free l33t upgrade (if not then you might have clicked the wrong thread).

Anyway, I am giving away 20 L33t upgrades by May 31st, 2018, with half of them being gone by April 10th.

This contest is to give non-upgraded members a chance on the forums. Let's face it, non-upgraded members aren't always shown the most respect yet every single member (aside from [Omniscient](#)) started as a non-upgraded member at one point. Regular members often want to be known and respected for their contributions but may get overlooked due to their status and that's just not fair.

The goal of this contest is to not only to support HackForums and [Omniscient](#), but to hopefully give new/regular members a chance to be something on HackForums – one upgrade at a time.

Requirements:

Must be a regular/non-l33t member.

Account must be newer than 2016 (Join date after December 31st, 2016)

Must be active on the forum. This means contributing and helping around the forums.

Must not be considered low quality.

Overall, be a benefit and not a nuisance to the community.

How to enter:

Each non-upgraded member gets 1 "free" entry by simply posting that they are interested in being upgraded to l33t. After that post, the only way to get more entries is by doing something meaningful such as creating a guide/tutorial, releasing something useful/interesting, or anything that shows your quality. If you do one of the above things, simply post a link to it on this thread and a short description of it (50 or so characters is fine). Please do not message me directly or spam the thread.

Please note that additional entries must be done AFTER the date this thread was posted.

How winners will be chosen:

At least one person will be chosen per two weeks. I will be periodically checking this thread and checking up on each person who posts. Winners will be chosen on a case-by-case basis. It's a mix of quality, activity, and a bit of randomness.

Winners:

Shaggy - February 24, 2018, 1:32 am

I like to be upgraded as a L33t

I want to these kind of things with it.

-Ability to change username = I want to change my Username because this is getting old plus it's part of my name which is not really convenient if I post in hacking section. I want to change it into something creative.

-Ability to create custom usertitle = Don't have a much in this but this is pretty cool feature when I want to show off my former group logo.

-Ability to give positive and neutral reputations = This will help me provide a thank you for those who helped me on my adventure on the hackforums. Because you got to give them credit since they earned it.

-Ability to add an image to your signature = This is great for me for advertising my own products or Advertising someone's Products and maybe Sell of my signature space if anyone is willing to buy or rent it. That would be great.

-Ability to upload your avatar = Like I said along with my username this will help me fit my role as what i changed my username into.

-Access to all member forums = I am not exactly sure what is this but it's still an addition to my adventure on HF.

-An HF IM XMPP (hackforums.im) account = Not so sure about this but it will be a great handy to have a IM with other members.

-Removal of Lounge post limit restriction = I'm rarely in lounge so I don't really need this but if that time comes I wont get restricted which is good.

-Can edit/delete your own posts up to 30 days = I think this only applies if I am unsure of what I post in a topic or thread.

-Can self-close your own threads = This is very useful to me when I have some Limited Product/E-Book to share with fellow members. Once it's saturated I can close it and they wont pm and post anymore in my thread.

Max Post Length setting is 12,000 characters = Don't really know if my writing now can reach to 12k words in limit or if I am allowed in this length to say my point that I want the upgrade.

-Can view a members Post Activity statistics = This could be useful when I am looking for someone who can rent out their signature space and show their statistics.

-Ignored members cannot view your profile = I only have 1 person whom I hate in this person it's the time to ignore him!

- Private message box of 1500= Being an 3Pic has 10.000 Storage in PM's so I dont need this now
- Removal of advertisements = Ads Doesn't matter me. I look ads as a fun to read when the internet is slow
- Bypass Prestige requirements for posting in certain sections = Prestige problems for me only met with im posting on CS:GO Subforum
- Bypass posting requirements for sending private messages = Never encountered this so I have no idea what this is.
- Ability to post in the Science, Religion, Philosophy, and Politics forum = I do need some Philosophy threads sometimes to clear my mind.
- Special l33t member group icon = Makes me look a little more badass with that l337 Icon under my name.
- Gauth 2-Factor Authentication account security = Won't use it will only cause me problems if I forget the passcode.

Goodluck to all!

Increase your chances of being picked by creating a guide/tutorial, releasing something useful/interesting, or anything that shows your quality. I review random pages of this thread a couple times a day and check up on members activity and posting habits.

Nice, you don't want those l33t's to go on people that don't deserve them only because they had luck. Respected

Correct. The goal is to upgrade 20 regular members to l33t so that they remain active and of benefit to the community.

I'd like to enter this! I want to post in more sections like science and religion section, and use the premium marketplace section. I also want to +rep people who have helped me and done deals with me. I really love all the topics in science and religion but can't make posts there yet. I feel like I can contribute good conversation to 90% of the topics in there.

Thanks for the giveaway man.

UpTheCrust - March 14, 2018, 8:45 am

Idk if this counts as showing quality and each post is in a different thread so I don't want to post links to them all, but I have been trying to comment and warn new members whenever it appears that some one is trying to scam them. Some common example are replying to the posts that the huonghacker scammer/spammer guy keeps posting from new accounts advising new members he is a scammer, replying to posts advertising rekings (especially when it is for a program that's free on HF or github) warning people they hike prices and sometimes fail to deliver, and warning people using vulnerable software/site like duckdns or dark comet.

I'm still learning so I don't feel comfortable doing anything big like writing a tutorial yet, but I try to help by making a bunch of small contributions

Some threads from the last week:

Hi I'm new to this forums and I'm intresserad in this giveaway. I'm with in all the requirements and I think I'm HQ member and will only be a HQ member to this community. I'm not so much for guides or tutorials but I do think I can post useful and interesting threads and posts on the forums.

I don't really feel disrespected just because I don't have L33T nether do I feel like people ignore me. I've so far only encountered friendly users. I do think you should respect everyone even if they have upgraded or not, I do feel like getting L33T could give me some more insight in the community. I've also only heard good things about L33T that's why I'm also intresserad.

I'll be sure to link a thread that I feel is useful and/or interesting to make you notice me more as you mentioned you could do that to have a bigger chance to get upgraded.

I also want to wish everyone good luck and I'm still happy if I don't get upgraded as it's his money and his choice to spend money on us. I still will be a HQ member and enjoy my time on HackForums.

I've already told you once. NO.

(Mar 19, 2018 07:52 AM)Charger Wrote: [\[CITE\]](#) No. Did you even read the thread? No, you didn't.

The whole point of this thread is OUTLINED IN THE TOPIC.

Quote:This contest is to give non-upgraded members a chance on the forums. Let's face it, non-upgraded members aren't always shown the most respect yet every single member (aside from Omniscient) started as a non-upgraded member at one point. Regular members often want to be known and respected for their contributions but may get overlooked due to their status and that's just not fair.

The goal of this contest is to not only to support HackForums and Omniscient, but to hopefully give new/regular members a chance to be something on HackForums – one upgrade at a time.

Charger - March 27, 2018, 8:55 am

Thanks for the giveaway!

Yep, let's face it - us non-upgraded members barely get any respect. Well, maybe it's because we can't even change our avatar unless we're paying \$20, and are stuck with a dull, grey name like in a Minecraft server without any ranks, so dim people just skim over your messages... It's a tough life, but I might donate later solely to get out of grey hell :p

Good luck to everyone!

It'd be awesome if I could have this, as I was recently looking around these forums and I see a lot of opportunity. I understand I'm not exactly the definition of "active", as I mostly use mcm, but I noticed that a lot of people on mcm are either 8 years old or scared to death by anything that breaks tos. Anyway, I'm trying to find a new community to be part of, and this one looks really enticing. I'm also a developer, and have a program that I am about to start selling on here. Thanks for reading!

I'm sure you are here because of the title and want a free l33t upgrade (if not then you might have clicked the wrong thread).

Anyway, I am giving away 20 L33t upgrades by May 31st, 2018, with half of them being gone by April 10th.

This contest is to give non-upgraded members a chance on the forums. Let's face it, non-upgraded members aren't always shown the most respect yet every single member (aside from [Omniscient](#)) started as a non-upgraded member at one point. Regular members often want to be known and respected for their contributions but may get overlooked due to their status and that's just not fair.

The goal of this contest is to not only to support HackForums and [Omniscient](#), but to hopefully give new/regular members a chance to be something on HackForums – one upgrade at a time.

Requirements:

Must be a regular/non-l33t member.

Account must be newer than 2016 (Join date after December 31st, 2016)

Must be active on the forum. This means contributing and helping around the forums.

Must not be considered low quality.

Overall, be a benefit and not a nuisance to the community.

How to enter:

Each non-upgraded member gets 1 "free" entry by simply posting that they are interested in being upgraded to l33t. After that post, the only way to get more entries is by doing something meaningful such as creating a guide/tutorial, releasing something useful/interesting, or anything that shows your quality. If you do one of the above things, simply post a link to it on this thread and a short description of it (50 or so characters is fine). Please do not message me directly or spam the thread.

Please note that additional entries must be done AFTER the date this thread was posted.

How winners will be chosen:

At least one person will be chosen per two weeks. I will be periodically checking this thread and checking up on each person who posts. Winners will be chosen on a case-by-case basis. It's a mix of quality, activity, and a bit of randomness.

Winners:

Does this say it's a upgrade-l33t-to-3p1c contest? No.

What is the contest for?

Quote:This contest is to give non-upgraded members a chance on the forums.

What are the requirements?

Quote:Must be a regular/non-l33t member.

So instead of asking for handouts, read the thread.

Jerrelle - May 17, 2018, 6:25 pm

Good luck to everyone, I've been on HF for way too long and it's about time I upgrade, but I'd like to pay myself and contribute to the forum for all the knowledge I've taken in over the years.

But I think what you're doing is a nice submission for the newer members of HF so +1 and good luck to all participants.

Mr Professor - May 17, 2018, 11:35 pm

I would like this. Thank you host for the giveaway!

Sir-Teabag - May 18, 2018, 7:49 am

Would absolutely love to enter. I can't afford to purchase it myself yet, so I hope my account is still eligible to enter.

I'll actually be away in the UK after the 26th so hope I don't miss anything here

I haven't really given much away yet, though I've been in progress of making my website (that you actually helped me with somewhere I'm pretty sure) open-source. Net-paste.com if you remember.

(Feb 20, 2018 02:52 PM)Charger Wrote: [\[CITE\]](#)

You're probably a new, non-upgraded member if you are reading this so first of all, welcome to HackForums!

I'm sure you are here because of the title and want a free l33t upgrade (if not then you might have clicked the wrong thread).

Anyway, I am giving away 20 L33t upgrades by May 31st, 2018, with half of them being gone by April 10th.

This contest is to give non-upgraded members a chance on the forums. Let's face it, non-upgraded members aren't always shown the most respect yet every single member (aside from [Omniscient](#)) started as a non-upgraded member at one point. Regular members often want to be known and respected for their contributions but may get overlooked due to their status and that's just not fair.

The goal of this contest is to not only to support HackForums and [Omniscient](#), but to hopefully give new/regular members a chance to be something on HackForums – one upgrade at a time.

Requirements:

Must be a regular/non-l33t member.

Account must be newer than 2016 (Join date after December 31st, 2016)

Must be active on the forum. This means contributing and helping around the forums.

Must not be considered low quality.

Overall, be a benefit and not a nuisance to the community.

How to enter:

Each non-upgraded member gets 1 "free" entry by simply posting that they are interested in being upgraded to l33t. After that post, the only way to get more entries is by doing something meaningful such as creating a guide/tutorial, releasing something useful/interesting, or anything that shows your quality. If you do one of the above things, simply post a link to it on this thread and a short description of it (50 or so characters is fine). Please do not message me directly or spam the thread.

Please note that additional entries must be done AFTER the date this thread was posted.

How winners will be chosen:

At least one person will be chosen per two weeks. I will be periodically checking this thread and checking up on each person who posts. Winners will be chosen on a case-by-case basis. It's a mix of quality, activity, and a bit of randomness.

Winners:

Check out the [Upgrade Page](#) as well as the thread: [Requirements System Explained](#) by [Maxim](#) for all of the benefits and perks of upgrading!
