F.A.Q:

Spoiler ([Click to View](#))What is VPNModule?

VPNModule is a re-branded version of VPNEngine. It is a PHP based VPN management system which helps you to manage your clients, servers, and payments all in one place.

I want to start my own VPN service but I don't know how?

You will just have to purchase a VPNModule license and we will help you get started.

Do we offer VPN servers?

Unfortunately, at the moment, we do not offer VPN servers however we can recommend you some good companies. Contact us for more details.

More F.A.Q's will be added soon.

After buying the premium package we started directly with setup the script and some VPN Servers. I have to say that I'm a very dumb person but this guy helped me out on everything, I feel really professional now because I could help now everyone who buys this script on everything. This support is very friendly and just showed me everything I need to know. I can contact at every daytime, support is nearly 24/7

I was expecting hard work to get this working but with this support it's like lighting up a cigarette.

I give to this Script 10/10 because it works very smooth and 10/10 to the support that really cares about their customers!

Thank you for your kind words. ?

do you have a Demo link ?

Norg - April 7, 2018, 4:31 am

I've added you on Skype to discuss somethings :)

NLSProductions - June 27, 2018, 8:43 am

Interested in purchasing this.

VPNModule.com is up for sale though?

faiskhan2016 - July 7, 2018, 10:50 pm

what if i have , my own dedicated IP's , and i want to code my own vpn ? how can i do that ? any hint on that ?

PhantomCode - September 19, 2018, 9:36 am

I like the work you have done.

Could i please ask though do you have any plans to make it so that a client can have dedicated IP address and also a way so that different clients are assigned different servers that they can access.

Also can i ask do you plan on implementing a feature where the user is limited to a certain amount of connections. depending on the package he has to prevent him sharing his credentials.

Thanks

Is VPNmodule still being actively developed?

Pronouncer - December 30, 2018, 10:32 pm

i thought this died when woopza left? is it still going
