Nice I love it, just some small changes, could you make the head a little bit smaller and clean up the withe spots on the edges of the suit?

Thanks in advance ?

I know but a monkey with \$\$'s on him looked weird as if he had a skin disease..

So i figured a monkey on a \$ sign would looked better and as a avatar it looks pretty cool in my opinion ?

Can you make a serial killer design? Zodiac related. Maybe even include the Zodiac sign on the design too. Look up 'Zodiac Killer'.

I would have two requests if that's okay. If it's not then it's okay.

Could you please make me:

1. An avatar that is similar like my current one (no background and mysterious) - basically like my current one, but there should be a guy with a suit instead (pose should be the same) - if it is too complicated, then don't do it.
2. A signature with a similar style, however it spells TrustWoofers somehow - something you see fit is fine (should be business/money related).

Thanks. Just let me know if it is too much asked.
