Thread: [Best Place for Free MyBB Themes?](#)

Effexion - February 21, 2018, 2:58 am

I'm not really a fan of the ones on MyBB and have been searching down a theme for my tarantula forum for days. Any good links you can share?

MyBB extend is where all public themes are officially posted.

You can look at more private themes on other mybb forums.
I would recommend avoiding ripped themes (not respected).

Other than getting leaked themes (which I dislike) chances are there aren't many good free themes out there.

Although a good amount of such themes are poorly made.
