Thread: [Do you have or have ever had Vechain or Waltonchain](#)

FaberCastell - February 22, 2018, 4:54 pm

So yeah just wondering if you ever bought(or if you are still hodling) Vechain or waltonchain?

Talent . - February 22, 2018, 5:18 pm

I have 10.5 k Vechain to run a node eventually. Honestly i'm not a fan of Vechain at all, but hey if it can make me money.

I also hold around 8k Wtc to run a masternode here soon in Q2 which takes 5,000 and will probably sell off the other 3k when I have enough money to make me want to sell.

Walton is gonna be a game changer the scope of the project is just so damn huge.

I also hold a solid amount of Omg :)

These are my biggest holdings luckily I bought into all of them super cheap.

Picked up Omg under \$5, wtc around \$2-\$5 and vechain around \$1.30- 2ish.

yaocrypto - February 22, 2018, 5:40 pm

I've been buying VEN since 5 cents all the way up to \$1, I knew it was just a matter of time until everyone caught on to it and it mooned hard. It's turned out to be one of my best investments the past year, I sold off a small percentage in January as a take-home profit and am now letting the rest do its thing.

DarkWebInsider - February 22, 2018, 10:10 pm

all in on vechain
lets get it venbr0z

Hi I am fairly new to cypto - How and where did you learn about them at that price? I got my ven at 6-7\$ and OMG between 15-20\$:(

Thanks

I'm not the person you replied to however there really is no secret to finding out about these kinds of coins. The answer is simple, do research. If there were a place everyone could go to find the next VEN or OMG then it'd already be worth a ton

hungryands - February 23, 2018, 10:52 pm

i bought 20k vechain at like 30 cents haha. sold it at like 50. one of my biggest misses in crypto tbh.

NiktoKan - February 24, 2018, 12:35 am

I bought Vechain during ICO for CNY0.50/Unit but get refund due to September 4 event.

Thank you.

Can i ask, apart from "Google" - are there specific sites you use for research?

Also can i ask what other coins do you hodl?

OMG, VEN, ICX, NANO, ETH, REQ,QSP,

Thanks

Walton is my baby, holding since september and wont sell for anything less then 1000\$.
Bought 77k ven for 0.20 and sold for 0.30 because I needed cash in real. Sad story.

I got into Crypto in late DEC.

I currently have OMG, VEN, ICX, NANO, ETH, REQ,QSP,

What else do you think i should look into?

shreder - February 24, 2018, 7:43 am

Ven wtc i have both sick as shit very good

RAT - February 24, 2018, 8:05 am

I bought VEN and made a nice profit with it a few months ago. I don't have any left. Still a great

investment of 50%+ ROI.

The Slotfather - February 24, 2018, 9:27 am

Yeah I currently still hold WTC :)

SecretAchiever101 - February 24, 2018, 10:29 am

Not a big fan of these too tbh

Anticipate - February 24, 2018, 10:34 am

Been holding WTC for a bit now. Pretty much the only thing holding my folio together after everything went to shit.
