Well that doesn't help you here... I am not sure where you exactly think you are but we are not into destructive acts, in fact there is no faster way to get caught than being destructive. Why not take a minute and get a lay of the land. Would you want someone to delete your accounts? it'd be pretty shitty I think. I saw that thread originally you said it was a friend all this jazz then said pretty much you didn't like the guy.

If you are being bullied at school, and cannot defend yourself, talk with a responsible adult. I understand sometimes bullies seem like the scariest shit you are dealing with, and there is no excuse for anyone bullying anyone that is weakness, the bully is not "strong" they are not cool.. they are just a shit. ASPWLF you are better and stronger than the bully, that weak sauced motherfucker has to pick on people that the bully only thinks is weaker than himself.. how sad is that? If you can avoid the bully that works, you don't have to hang out with the son of a bitch, if he pretends to be nice well don't fall for it he isn't your friend or anything close to it. I understand why you would think that nuking his FB might be the best thing.. but you told the guy already what do you think is going to happen? He will instantly blame you and if you think it's been bad that shithead now has a reason to do worse.

Asking for help with hacking things which are not your own we just don't help or anything destructive, why? It's illegal not just for you but for us to even help beyond that some of us here do not want bad things to happen to just average people kinda sucks, then lastly this is a public forum and often the news tends to feature this forum as some kin of den of thieves or a dangerous set of users, no one is interested in propagating this myth.

Do you understand that several users here have been arrested?! Do you understand that? Do you think that the bully which you are dealing with is any worse than juvenile department of corrections or what ever they have in your country for juvenile offenders? Simple answer is fuck no. Do you think that we are bored and say " Ahh I need a vacation " then call the prison and say " Hi, I need to book one for three years, thank you"? No we don't need that shit in our lives dude and neither do you want it or need it.

Re-read this post a couple of times don't justify why it's okay understand what I am writing first.

Even if he could delete the account, just a simple login would reactivate it.

I agree with sirru5h. He put a lot of effort into his replies here so I do hope you listen. Hacking into accounts for bad reasons, or just in general is never going to end well.
