Best Crypto Gambling Guide [Low Risk/High Reward]

Overview

Hey everyone I have figured out the best and fastest way to easily make 10x the amount you invest within 10 minutes! With my method it is LOW RISK and HIGH REWARD. This method is FREE unlike every other method, it can be used on any Dice site, however I will provide you three sites that I have confirmed to make over \$300 on each site when using this method. This method is for those who have little to none to invest or for those who have lots to invest and even more to earn! It's simple and quick and is the safest method I know of, it's manual and there is no Auto-betting for this method. Let's get started.

Method

First you're going to have to register

[HERE](#)

or

[HERE](#)

or

[HERE](#)

Then you're going to either invest any amount you want or claim the faucet, with the First link you can claim 100 bits from faucet. With the second you can claim 100 bits. With the third and last link you can claim 500 bits!

After claiming faucet or investing you will then start playing with these settings:

Set WIN CHANCE to 89.75%

Profit

After doing that you will begin the method..

First MAX bet and on profit reset to MINIMUM bet until you lose, then bet a few more times until you feel its safe and MAX bet again.

Rinse and repeat. As you play you will then raise your minimum bet and half your MAX bet for security. After 10 minutes I guarantee you will 10x your initial investment or the faucet, this method is by NO means 100% Safe but it is FAST and profitable! I hope you have fun and gamble responsibly! Enjoy and reap your rewards!
