Cracking is captchaless, but once you find a valid account you need a captcha for capturing cash, rep etc

Overall

The program has proxyless and captchaless mode for cracking of social club accounts, and the capture is detailed but requires anti-captcha credits and HQ proxies (or you can check the hits manually for plebs). This is so far the best Social club/ GTA5 cracker i've used, despite some small UI bugs that will be fixed in the coming updates. You can definitely earn your money back if you know what you're doing with this program. Good luck with sales to OP :)

Great Vouch Man, Thanks ?

Just bought the checker, I plan on resetting my computer in a weeks time, will I have to contact you for a HWID reset ?

Edit, its been working good with proxies, proxyless is kinda iffy IMO but its good.

Having a small error tho, everytime I open "FiveM" (It's a GTA 5 Modded Launcher for RPinG) I get

a pop up (Debugger Detected) and when I click ok, it closes the cracker, so I can't game while I crack accounts.
