Is it no longer possible to view how many reported posts yourself (or a member) has?

I was getting close to 1,000 and wanted to see how far off I was but couldn't find it.

You are correct. You no longer can view how many reported posts you have.

Well, that sucks. I think people like these little statistics, which help them do more.

I did enjoy seeing my amount of reported posts too, I was well over a thousand at the time of the loss of statistic.. But hey, you shouldn't only be reporting based off of a little number.

I'll fix it. The reports were changed with MyBB 1.8x.
