Thread: [Here's an easier way to resize your large thread images.](#)

F?cqlе?? - March 1, 2018, 6:08 am

We all know images can be resized by putting custom dimensions in the image tag:

Code `[img=200x300]image.png[/img]`

The problem is if you don't know the original dimensions, it's hard to do without throwing off the aspect ratio and fucking up your image.

1) Instead of using pixels, use a percentage:

Code `[img=50%]image.png[/img]`

2) Preview your thread and the percentage will be replaced with the length x width.

Like so:

Try it by replying to this thread with a large image.

Renowned - March 1, 2018, 6:09 am

In all my years of being here, I didn't realise it was this easy to re-size an image straight on HF. Used to spend ages resizing them manually.

Y3LI0NZ - March 1, 2018, 6:14 am

Cheers for this, sure it will help alotof people.

Ninja - March 1, 2018, 6:16 am

Nice tutorial man. I'll be sure to follow this whenever I need to do this.

Elitas - March 1, 2018, 6:18 am

Hmm, I think I knew about this but never used it, this is pretty useful. Thanks for the guide. I'll definitely use it.

Does it accept more than 100%? Like 110%?

Asking, because I don't have an image to test it on right now.

? Soufian ? - March 1, 2018, 6:21 am

Been on HF for years and yet I didn't know about this...

Always putting huge images between spoiler tags while there's actually a solution for it lol

F?cqlе?? - March 1, 2018, 6:32 am

It does. Seems like the only thing that doesn't always work is making a really small image even smaller.

Elitas - March 1, 2018, 6:33 am

Hmm, it can't get too small, otherwise it wouldn't even be 1px x 1px. ?

Welcome to the future mother fucker.

Haseo™ - March 1, 2018, 7:02 am

Thank you very much for the tip, I didn't know about this either.
will save me lots of time!

F?cqle?? - March 1, 2018, 8:43 am

Yeah it's really annoying when I open a spoiler and it takes up the entire screen.

spradebassen - March 1, 2018, 9:18 am

thank you a lot for this fuckless

N1l0c - March 1, 2018, 9:32 am

Exactly what I thought.

Maybe this came with 1.8? Dunno.

Charger - March 1, 2018, 9:37 am

Really?

I never knew you could do percentages.

Danny Khalifa - March 1, 2018, 9:37 am

Fuck, I never realized I could do this lmao
Thanks

Charger - March 1, 2018, 9:37 am

Looks like you gotta preview it first or post and then edit.

F?cqle?? - March 1, 2018, 9:40 am

(Mar 1, 2018 10:37 AM)Charger Wrote: [\[CITE\]](#) Looks like you gotta preview it first or post and then edit.

You do have to preview first per step number 2.

Elitas - March 1, 2018, 9:42 am

(Mar 1, 2018 10:40 AM)F?cqle?? Wrote: [\[CITE\]](#) You do have to preview first.
It doesn't work unless you preview it? That seems pretty odd. Maybe it's a bug and it can be fixed, there are some issues with MyBB previewing already.

Charger - March 1, 2018, 9:42 am

Not sure. Maybe Omni will see this and know a quick fix.

Elitas - March 1, 2018, 10:15 am

Hmm, I'll see if I can find out why and message him if I find a fix.

Crystallize. - March 1, 2018, 10:15 am

Never knew about this, will come in handy.
Thank you a lot!

JoshAllen - March 1, 2018, 10:18 am

What the fuck, is this a new feature?
This is amazing.

F?cqle?? - March 1, 2018, 11:53 am

(Mar 1, 2018 11:18 AM)Ty TM Wrote: [\[CITE\]](#) What the fuck, is this a new feature?
This is amazing.
Not sure. Best way to find out would be to visit a forum running an older version to see if it still works.

F?cqle?? - March 16, 2018, 5:22 am

Just tried this on an older forum and it still works. Must not be a new feature after all.

RAT - March 16, 2018, 5:28 am

Nice guide, thanks a lot lol, didn't know that you could do that without losing the aspect ratio.

Vanderbilt - March 16, 2018, 6:05 am

saving this for later, thanks

SIM-1589588 - March 16, 2018, 6:18 am

It works..cool
Thanks man.

That's a wonderful avatar OI' Musky.

SIM-403479 - March 16, 2018, 12:17 pm

I think I used this before, came across it during a quote.
