Thread: [SMS Verification API](#)

Benoit balls - March 3, 2018, 2:49 am

an API that you can request a phone number, assign one for you and will let you query its sms messages.

How much is it worth? should I charge per number? per verification?

Loses - March 3, 2018, 2:51 am

Depends how easily they are to obtain. Depending on that you'll find your price. If you charge too much, someone will just undercut ya with your own business.

Bronze - x numbers per day/week/month

Silver - x 2

Gold - x 5 unlimited or w/e

Could do it that way.

maybe i should limit it to a certain amount or maybe charge by the number, but what price range are we talking about?

Assuming that you don't have restrictions to these.

I would say like .50 cents per phone
