Thread: [\[HookNet\] NEW MINING BOTNET - NEED BETA TESTERS - pictures added](#)

BitcoinCriminal - March 3, 2018, 7:48 am

Im going to keep this short and sweet, i need beta testers for a new mining botnet ive been developing, the base of the net is completed and theres still much work to do, these applications may not be acted on for another 30-60 days while i develop.

all testers will get free lifetime rebuilds/updates when the product is released, the tests are held partially on my server in early stages. Testing involves acting as if it was your normal net, crypting the stub, adding some bots, etc. Then reporting back with results and if theres any errors/improvements to be made

This is a mining botnet, specifically for xmr/dash/zcash, these beta testers can also recommend one coin they would like implemented and i will do my best to put it in. So far the xmr miner is completed and is working well with the given antis.

Do not send any bullshit, this is a serious inquiry and benifital to those accepted.

send applications to this jabber: thehook@exploit.im

Code Username on hf:

AS FOR THE BOT:

- we're looking at under 100\$ for a basic panel build with the .net versions, around 100\$ for a tor build, and close to 400-600\$ for the native builds once theyre done. This isnt going to be a shitty overpriced net, this is going to be a well coded, affordable botnet so everyone can have something to rely on, and make their money back with

Heavily encrypted connections with panel is done, working on tor panel communications

Basic dl/exe and update are done - working on dl/inject

Xmr mining is done - working on other coins

Basic injections - working on full rootkit still

Trying to keep stub under 200kb

inyourmemory - March 3, 2018, 11:49 pm

What language is this being developed?

BitcoinCriminal - March 4, 2018, 6:16 am

(Mar 4, 2018 12:49 AM)Win64Worm Wrote: [\[CITE\]](#) What language is this being developed?

im going to release a .net dependent version, and then switch to native a few months after. I can code c right now but i dont trust myself enough with rootkits/injections and communications, especially with a tor panel. So until im comfortable with the security levels of it i wont be releasing a native version until after the .net version.

Smile? - March 4, 2018, 6:30 am

It will be HTTP Botnet or IRC?

BitcoinCriminal - March 4, 2018, 6:32 am

(Mar 4, 2018 07:30 AM)dåFu™ Wrote: [\[CITE\]](#) It will be HTTP Botnet or IRC?

i thought about irc but its just not enough for it, http it will be. the panel for it is 50% done if you guys want a sneak peak.. there will be only one ddos function(udp), dl/exe, update, visit website, botkiller, mining, and possibly socks 4/5 support.

0xzz - March 4, 2018, 12:50 pm

IRC OR HTTP? Irc is better. ?

G0dzSoldiers - March 4, 2018, 7:42 pm

Looks dope Good work Bud!!!

Yattaze - March 4, 2018, 7:55 pm

Sent you a email man, looking forward to your response

in what way is irc better ?
On topic looks nice keep us updated @OP

BitcoinCriminal - March 5, 2018, 2:50 pm

thanks guys, this is going to be a big work in progress, it wont be done for another 3-4 months but trust me itll be good!

RackOverflow - March 7, 2018, 7:22 pm

Looks good man! I'll shoot you a email. Gonna see if any other privacy based cryptocurrencies exist.

Yattaze - March 7, 2018, 7:55 pm

Should add Garlic Coin to the list of cryptocurrencies
? ? ? ? ? ? ? ? ? ? ? ? ?

MaDTiA - March 8, 2018, 12:23 pm

hit me up if you are still looking for some serious beta tester

BitcoinCriminal - April 21, 2018, 6:36 am

I have worked my ass off on this project since i last logged on. There is alot more done and id say its 70% finished, i will post new pictures soon!

XanaxHeister - April 21, 2018, 6:51 am

Hey are you still looking for beta tester because I m interested to apply

Dezinator - April 21, 2018, 4:04 pm

Got some experince with Botnet Mining. If you are able to fullfill what you promised PM me ! Looks good so far.

SID - April 26, 2018, 3:22 am

would like to give it a try when it releases, hit me up when its done :)

Spade - April 26, 2018, 8:20 pm

Not a bad reskin
hope for future updates! also good luck young fellow!

Dezinator - April 27, 2018, 8:30 pm

Got some experience in Botnets and Mining. If you could proof some of your Postings with some short Code Examples I would love to test it.

Idontknowstuff - April 28, 2018, 9:33 pm

Awesome UI, good luck with further development

BitcoinCriminal - May 7, 2018, 2:49 pm

fuck .net, native version is being coded

AnonTri - May 7, 2018, 4:52 pm

In the second preview it says OS and then lists browsers... OS Edge Safari Firefox

Good, made me laugh when you said working on a rootkit with .net

Deflate - May 8, 2018, 2:14 pm

I like the UI, how long it will take you to finish this ?

BitcoinCriminal - May 8, 2018, 5:46 pm

If is stable and keep the bots, no bugs at all, mining good then im your first client when you release it.

you should add and pool option like to choose a pool which you want and coin like for XMR, if is possible to make it for GPU if not then CPU is fine, and it to show hashrate of the total bots.

BitcoinCriminal - May 9, 2018, 8:55 am

(May 9, 2018 08:49 AM)Deflate Wrote: [\[CITE\]](#) you should add and pool option like to choose a pool which you want and coin like for XMR, if is possible to make it for GPU if not then CPU is fine, and it to show hashrate of the total bots.

when the task is ran itll ask for pool info if thats what youre talking about

It'll autodetect gpu/cpu and run the most profitable but it can also be declared via the user. Im working on the hashrate, its hard to pull the hashrate from the miner ive put together without fucking with shit

flowsizer - May 13, 2018, 3:56 pm

Will you be able to choose CPU/GPU use percentage/thread count?

PlugWalkJoe - May 14, 2018, 6:58 am

The fact you registered a new account with a new alias, is just booming me with suspicious signals, your panel looks TEMPLATE AF, I don't know you don't know me i can't comment on this without proof of course, but one thing I can say, the fact you've went thru the trouble to create a new account solely to advertise your HTTP botnet is raising alarms,

No hate fam Although i don't recommend people to act stupidly ' Shut up and take my money '

GodAmon - May 19, 2018, 12:26 pm

achievements ? ?

Burglary - May 19, 2018, 12:29 pm

I would be excellent as a beta tester, YOU CAN ASSURE THAT i DO NOT LEAK and I certainly I will be honest and leave a honest vouch.

BitcoinCriminal - May 19, 2018, 2:36 pm

It was a template lmao, botnets aren't about panels, they're about the bot

flowsizer - May 22, 2018, 11:21 pm

OP has scammed me for measely \$205 on hooksetups and cannot setup a proper net. Has not delivered bots, gave an outdated net, will not deliver. I have tried to contact numerous times with no response, I tried to give the benefit of the doubt. Do not trust this seller.

Avoid doing business with this scammer.

ccdropped - May 23, 2018, 5:26 am

Looks really dope, looking forward to this!
