Looks quite cool :) I like that it's a side on view of the panda & he looks quite mean looking. Good work!

The colors are good but the anatomy is a little off and it is throwing me.
Your line work is solid but I would work on refining the anatomy to really bring it all together.

I like this. I think it would look cool on the back of a shirt

Looks quite cool :) keep up the good work

i like the body itself plus the colors, yet those teeth and nose look weird - both dont fit in and somewhat destroy the actual good approach and make it look silly

The shape is great. There are few choppy lines, and bottom part could use some work, but overall, the shape looks really good IMHO.

Shading could definitely use some work. Some of it doesn't make much sense, it looks like you have multiple light sources. Also, the style of shading is not consistent. Some shades are thick AF while others are barely visible.

Ellipse/shadow under the panda, again, doesn't make much sense, it's wider than the panda, which would make sense if the light source is right above panda, but than again, if you have a light source there, the rest of the shading is wrong.

Anywho, good job buddy, if you need any help, HMU. :)

The logo is nice but i feel like the teeth are unnecessary and can be done without.
Otherwise i like it very much :D !
