Thread: [{C/ASM} NTCrypt || Unique Injection Method || Private Stubs only](#)

Aquatico - March 3, 2018, 2:05 pm

Screenshots:

Spoiler [\(Click to View\)](#)

Information:

NTCrypt is a fully NT based crypter with a unique injection method that will guarantee a high execution rate unlike other crypters that rely on traditional and overused methods to achieve payload execution. We are also heavily monitoring new runtime detections to ensure the best possible experience to our users.

Features:

Completely unique injection method(never used in the field) assuring runtime evasion.

Completely unique startup method bypassing all proactives.

Completely unique stubs.

Small stub size (~20-60kb).

Full UNICODE support.

High execution rates.

Active support.

Plans:

\$500/month with 4 stubs.

\$1000/month with 10 stubs.

(Mar 4, 2018 04:24 AM)Tsukiri Wrote: [\[CITE\]](#) Looks very nice and professional. I am interested.

May I ask who coded this? Someone who wish to remain unknown for now, but he's in no way a new guy in the field.

Tsukiri - March 4, 2018, 3:48 am

(Mar 4, 2018 04:30 AM) Aquatico Wrote: [\[CITE\]](#) Someone who wish to remain unknown for now, but he's in no way a new guy in the field.

Ofcourse, otherwise there wouldnt be a private injection method coded in C/ASM.

I must say that it looks a lot like BroadCrypter to be honest. The design is similar, but Broad was C/ASM aswell..

Well, good luck with the sales bud!

Aquatico - March 4, 2018, 3:58 am

(Mar 4, 2018 04:48 AM) Tsukiri Wrote: [\[CITE\]](#) Ofcourse, otherwise there wouldnt be a private injection method coded in C/ASM.

Well, good luck with the sales bud!

i'm not affiliated with broad anymore or any of TOWs activity .

MaDTiA - March 4, 2018, 10:22 am

i was lucky enough to be a betatester of his fud stub and i can only tell you that: the execution rate is near to 100% , the support is amazing and very fast and reliable , everytime i had a tiny issues he joined my teamviewer for fix it and even refud'ed my stubs for free when the problem was obviously my software to crypt .

now let's shoot some numbers

i spreaded a few days with ntcrypt and the output was always and i mean ALWAYS FUD , i reached more than 1k download and execution and everything went smoothly asf so smoothly that my botnet crashed due to heavy tons of connection !

if you are loooking for the top notch quality product well you have found it ! from imperium crypter to ntcrypt the quality is his main goal ! so don't hesitate to deal with him because every cents you pay worth it ! if you need some help with the crypter feel free to pm me for support or any question !

my honest rate is 100/10

i never never never used a crytper stable and fud like this one ! BUY IT BEFORE IS TOO LATE !

kauf - March 11, 2018, 7:47 pm

4stubs for \$500/Month, what is the FUD time duration of a stub ?

and what if i don't use my 4stubs all through the month will i still be able to continue till they are all detected?

what is your runtime on dyncheck?

if stub didn't work as advertise, will you replace?

does it work on both .Net and Native file?

Eset is one of the headache for crypter, how long does each stub takes to get detected by Eset?

4stubs for \$500/Month,
is kinda expensive but must proof its worth

whendarknesscomes - March 11, 2018, 10:08 pm

Eset is one of the headache for crypter, how long does each stub takes to get detected by Eset?

4stubs for \$500/Month,

is kinda expensive but must proof its worth

the stubs you get are 100% unique to you and will last more than a year if you don't touch them so FUD time depends on how you use them, runtime on dyncheck is 0/23 and there is no way the stub i send doesn't work as advertized lol, if you plan to use .NET, this crypter is not for you, for eset all depends on your stub usage as i said before.

what proof are you talking about ? videos aren't enough ? you're welcome to add me on jabber and see your payload by TV against AVs.

myxhacka - March 12, 2018, 4:07 am

I already got mine, did a runtime test with ESET, and eset was just silent as Real Madrid was when Barcelona beat them in their home

Real Deal, Dope coder and good support.

Hope you don't get famous

I'm, pleased

codesploit - March 13, 2018, 8:14 am

SIM-3132187 - September 23, 2018, 11:38 am

Hi, do you bypass nortan reputation system ?

Aquatico - September 25, 2018, 2:06 pm

(Sep 23, 2018 11:38 AM)frenchy440 Wrote: [\[CITE\]](#) Hi, do you bypass nortan reputation system ?

Norton is bypassed with Internet ON, but if you download the crypted executable DIRECTLY from a browser, you will get a warning from norton saying the file is not known enough (Reputation based

warning). you either need to deliver your payload in a different fashion(macro, exploit...) or you need a certificate.

Meedman - September 30, 2018, 2:38 pm

Used this crypter for about 2 week

Used 2 stub of the 4 and I can tell you it has looong fud time and very very good at Runtime !

Kind Regards,
Meedman

tdoxent - October 1, 2018, 7:04 pm

Henry Hatton - October 23, 2018, 2:04 am

Will buy this soon.. Nice tool

Aquatico - October 24, 2018, 5:26 am

Currently updating NTCrypt to support x64 payloads.

hamal.anuari - October 24, 2018, 6:50 am

Dear Aquatico i sent you a PM, please kindly respond its very urgent. Thanks

phpconsultant - October 26, 2018, 3:52 am

uhm, seems nice. will check it out!

jp78 - October 28, 2018, 9:12 pm

Vouch! Aquatico has been responsive & helpful

tochukwu202020 - November 2, 2018, 3:52 am

does this crypter work with FORMBOOK ?

Aquatico - November 5, 2018, 3:24 pm

(Nov 2, 2018 03:52 AM)tochukwu202020 Wrote: [\[CITE\]](#) does this crypter work with FORMBOOK ?
Yes it works... :)

Aquatico - November 13, 2018, 10:41 am

*Fixed memory freeing failures at NtFreeVirtualMemory using RunPE.

*Added PE Loader with:

-Support for both PE with .reloc & no .reloc.

- Support for TLS(fully TLS handling including TLS Slots).
- Support for memory protections.
- Support for IAT.
- Patch PEB with new informations.
- Command line supported.
- *Checksum set properly.
- *Added support for custom last section name.

With internet off = 0/23: <https://dyncheck.com/scan/id/cbda5ba63b90f603a6cffca9bf8b4e19>

Dyncheck with putty(verified by mod on explo*t.in) and internet ON + 240 Sec:

AhnLab = Just notification(you can see putty running in images).
 Avira(Cloud Only) = need certificate(code signing).

MsifeM - November 13, 2018, 4:00 pm

btw is it compatible with parasite http ?

Aquatico - November 17, 2018, 7:45 pm

-11/18/2018:

- *Fixed some runtime issues when using RunPE with Kaspersky & Dr.Web.
- *Fixed a tiny memory leak.
- Please note that this update need new stubs to work out, so kindly contact us on jabber.

StanleyK - November 20, 2018, 3:39 am

Seen some nice reviews but how long does the fudtime last for one stub on average? I know it depends on usage, but if u use well how long can it last

sequencehabla - November 21, 2018, 5:49 am

I am interested. Send me in pm your jabber.

Aquatico - November 21, 2018, 9:31 am

Jabber is on the thread, fud time depends only on your stub usage.

Information:

NTCrypt is a fully NT based crypter with a unique injection method that will guarantee a high execution rate unlike other crypters that rely on traditionnal and overused methods to achieve payload execution. We are also heavily monitoring new runtime detections to ensure the best possible experience to our users.

Features:

Completely unique injection method(never used in the field) assuring runtime evasion.

Completely unique startup method bypassing all proactives.
Completely unique stubs.
Small stub size (~20-60kb).
Full UNICODE support.
High execution rates.
Active support.

Plans:

\$500/month with 4 stubs.

\$1000/month with 10 stubs.

Amphitrite - December 5, 2018, 8:23 am

I have a very simple Question.

If i pay for 4 stubs but for whatever reason was able to use only 2 before the month elapses.

What happens to the 2 remaining fresh stubs? Are they expired?

Sorry, but am not an expert.

Aquatico - December 5, 2018, 9:41 am

no, i can add days if stubs are not used for free.

Cat-Boy - December 5, 2018, 6:15 pm

i really wish this was still up because its hard to find crypters that are made like this in this day in age because its just to much work and it can be done easier but its worth the work.

Twistd - December 5, 2018, 8:34 pm

Looks like The Old Warrior merged his old Broad-Crypter in to NTCrypt.

Not sure why you're saying that doppelganger has never been used in the wild.. its literally everywhere.

Aquatico - December 7, 2018, 7:33 am

(Dec 5, 2018 09:34 PM)Twistd Wrote: [\[CITE\]](#) Looks like The Old Warrior merged his old Broad-Crypter in to NTCrypt.

Imao i don't know why all of you think it's "BroadCrypter", it's not.

the method wasn't implemented before and it's not exactly doppelganging, you can read here since the first stage here was a stub:

https://blog.malwarebytes.com/threat-analysis/2018/08/process-doppelganging-meets-process-hollowing_osiris/

(Dec 5, 2018 07:15 PM)Cat-Boy Wrote: [\[CITE\]](#) i really wish this was still up because its hard to find crypters that are made like this in this day in age because its just to much work and it can be done easier but its worth the work.

We're still up.

Uhm, not exactly doppelganging? But that's exactly what the link says, just with a pe loader as second stage....

FalsifiableMeme - December 7, 2018, 10:44 am

I heard ESET updated their memory scanner to actually function properly, and it now scans mapped sections (NtMapViewOfSection). Before it only scanned private commits (VirtualAllocEx). Can you confirm if this is true, and if so, are you bypassing it now?

Aquatico - December 7, 2018, 2:40 pm

(Dec 7, 2018 09:41 AM)Twistd Wrote: [\[CITE\]](#) Uhm, not exactly doppelganging? But that's exactly what the link says, just with a pe loader as second stage....

No, the original implementation use NtCreateProcessEx(mine use CreateProcessInternal & map a section from an image object and then i carry on with patching entrypoint of the original image with a far jump).Also, the only doppelganging thing seen in the wild is SynAck and it doesn't use the same

method... for PE Loader thing, only the first stage was NTCrypt.

I agree with you that is not something really that much unique but it does the job.

(Dec 7, 2018 11:44 AM)FalsifiableMeme Wrote: [\[CITE\]](#) I heard ESET updated their memory scanner to actually function properly, and it now scans mapped sections (NtMapViewOfSection). mapping the payload as image bypass ESET memory scanner (which i do).

Aquatico - December 7, 2018, 2:53 pm

(Dec 7, 2018 03:43 PM)Twistd Wrote: [\[CITE\]](#) This is the dumbest shit I've read all week. No this is definitely not true. Why on earth would mapping the data make any difference for eset memory scanner.....

Please refrain from starting an arguing drama here, this is a sale thread not a "how to bypass AVs" one.

Sani65 - December 8, 2018, 3:50 am

support all rats and crypt exe file ??????????????

Aquatico - December 8, 2018, 2:39 pm

(Dec 8, 2018 04:50 AM)Sani65 Wrote: [\[CITE\]](#) support all rats and crypt exe file ?????????????? doesn't support .NET files. all natives exes should work.

SteamedHams - December 9, 2018, 12:53 pm

Interesting in purchasing this, does this bypass ESET on the latest update? Also compatible with anti-debug?

codesploit - December 9, 2018, 1:55 pm

(Dec 9, 2018 01:53 PM)SteamedHams Wrote: [\[CITE\]](#) Interesting in purchasing this, does this bypass ESET on the latest update? Also compatible with anti-debug?

i have been using this for months i can confirm to you it bypasses that easily runtime, i use dyncheck with extended function on runtime check it comes out clean. dude, if you have the money go for it don't think twice. high quality product, works like a charm on most native programs and the vendor is always online via his jid to refud without extra charges plus advice you on settings to use. OP is polite understanding and does not have the hash usually abrasive/dismissive manner of some other sellers. gives you so many extra days whenever you run out of your current package(s) with unfinished business. i am not affiliated to his product just a satisfied client giving an honest opinion. highly recommended.

Aquatico - December 10, 2018, 5:57 am

I would like to post a reminder here, if your malware is some old shit like BetaBot please i beg you to fuck off.

Aquatico - December 15, 2018, 9:28 am

Updated startup for 360 chinese version.

Spots are still open.
