Hello

I want to increase traffic to my site and be safe on my Adsense account

Promote it using social media / real ad networks (popunders / similar are NOT allowed). Do not try to cheat AdSense, that wont work, you could always try reddit if you make that type of content.

One trick that I've found has been to target tier 2 countries in facebook, and use high converting images (Facebook TOS) with niche related targeting. The ROI is somewhere between 35% and 50% if done correctly. I would also add an email list offer to the mix to maximize on the traffic you buy from Facebook. This will help even out the amount you make per traffic.
