Am I being really dense or is it normal to sell a detected cheat?

To be honest, there are more people than you think interested in buying detected memory cheat or memory in general.

With detected memory , you can still rage boost someone => \$\$\$. You can also, but it's less ethic, spam the account to rank it high and then sell it for a high price before it gets banned. Or just play for fun, rekking everyone in your games then move to another account :D

Side note for Op: You might want to explain the whole screen locked thing with the pixel bots.

Reasons such as these are why most people by memory cheats, detected or not.

How long is the undetected one still undetected?

Does anyone tried this provider?

CouncilSlayer - March 6, 2018, 2:59 pm

Here is my honest review after purchasing one day.

I never got to use the hack as wraxu and the dev couldn't get it working on 2 of my computers. wraxu made a sincere attempt, but couldn't do much as he's the reseller only. The dev just went through the basic steps that wraxu already suggested to me and I ended up wasting \$17 for the day period. I still got banned a day later for the hack being opened while Overwatch was loaded so that sucks...

wraxu does state in the thread that it's detected and it's basically to boost accounts or play for 1-2 days and have fun... If you can't read, this isn't for you then.

I honestly don't know in your case, if you got banned I assume its because the cheat would inject but something was blocking the aimbot. I am working with my affiliate to try and find out...

wraxu - March 8, 2018, 3:10 am

Cheers.

Glock40 - March 8, 2018, 8:35 pm

For boosting or for fun. Get two accounts one using the cheat. Rage boost all day and account that used the cheats will be banned. Second account will be boosted and NOT banned.

Both Unavailable. I think JR might be unavailable because of yesterday's ac update. No official confirmation though.

kokoomong - March 19, 2018, 9:46 pm

So, the Rose cheat will still ban after a day or two just like Dream?

Eazy - March 19, 2018, 9:55 pm

(Mar 19, 2018 09:46 PM)kokoomong Wrote: [\[CITE\]](#) So, the Rose cheat will still ban after a day or two just like Dream?

Rose is completely different from Dream.

Rose is undetected. The main point for Dream is it is a stronger aimbot, but thats due to it being a memory hack. Most people use dream to rage boost accounts in duo's, then sell the account that wasn't hacked on. I hope this helps.

I can vouch for both hacks, as I've used both.

kokoomong - March 20, 2018, 10:57 am

@JoomlaHQ, that didn't answer my question. I understand it's undetected. So does that mean that the account that used Dream WILL or WILL NOT get banned after a few days?

CouncilSlayer - March 20, 2018, 3:39 pm

The account that used dream will get banned... He answered your question by saying Rose is undetected..

I am interested in Ghost for PUBG. How long is it undetected? I don't want to get my account
banned. Just want to have fun for a day without getting banned.

I prefer to deal on site , and do you accept BTC? I'll start a contract with you if you agree to deal
with me.

Textralia - September 9, 2018, 9:57 pm

Rose def seems some combination of detected and abandoned and Inject hacks are way too risky.

Bugger.

lil purpp - September 10, 2018, 11:08 pm

Why would you pay for a detected Overwatch cheat? Unless detected means something else
regarding Overwatch cheats that would just ban my account right?
