Thread: [Free GameServer CSS/CSGO/MineCraft/GMOD/TF2/Insurgency](#)

Blue Eye Samurai - March 4, 2018, 10:38 am

Trying to do something back for the community. Might start a gamehosting service later on.
I will giveaway 1 GameServer for a month to the winner.

What to expect:

You will receive a webpanel where you can start/stop/edit files/add mods/Monitor
You're able to add mods with a click of a button(DarkRP/ULX/SourceMod/Metamod) And Such.
Expect A Panel Like This:

GameServers are hosted in Germany - Tier 3 Datacenter

If you want to enter this contest, please fill in below why you want it

Quote:Why do you want to have a gameserver:

Are you going to use it actively:

Choose any game: CSS/CSGO/MineCraft/GMOD/TF2/Insurgency:

Slots [32 Max]:

I will choose the one who deserves it the most.

Ending Date: 04/04/2018

Why do you want to have a gameserver: |I only have a crappy dedicated gmod server which is utter garbage, and is really laggy whenever I have more than 9 people on my server. I don't have just one server, I have about 3 servers; TTT, DarkRP, and Sandbox. I would love to have it mostly so the player will not get lag, and enjoy their experience on my server.|

Are you going to use it actively: |Yes, obviously I would use it almost every day, probally take breaks here and there but I would use it alot so my server gains traction, and I get alot of players on my server.|

Choose any game: CSS/CSGO/MineCraft/GMOD/TF2/Insurgency: |GMOD|

Slots [32 Max]: |Since the server I want to make if I get this is DarkRP, I would say 32 slots.|

I am still giving this away, we've recently added some updates to the panel so it's much more user friendly
