Build Your Own SILENT CryptoCoin Miner in 15 minutes!

Will provide a small tutorial written in notepad, its easy to understand if u understand basic english.

"First time setup takes around 15 minutes, after that you can compile new silent miner's in minutes"

This is a very easy and simple way to make a miner.exe with any pool address / worker's etc u want that start's & run's 100% silently in the background ?

Just reply and/or pm me if you are interested ?
