Thread: [VeloxCoin - Anonymity & Decentralization \(small cap coin\)](#)

?Enlightened - March 4, 2018, 8:32 pm

*Just remade the thread removing and adding some info and added their thread GFX from the bitcointalk thread.

VLX is an underdog coin right now, very small cap, own exchange, with a goal to build an anonymous exchange hosting in a decentralized fashion (using ZeroNet modified) and an open-source decentralized wallet.

More extensive info can be found below from their bitcointalk thread.

When this thread was created price was 0.0007-0.0009BTC
Since it was last edited it is now 0.0009BTC-0.00011BTC

Very cheap, only \$20-\$30m market cap.

James Harden - March 4, 2018, 8:38 pm

Great post, I feel the same way about this coin. Bought it on the Sale @ 7k Sats. Great Future ahead for VLX!

?Enlightened - March 4, 2018, 9:58 pm

(Mar 4, 2018 09:38 PM)James Harden Wrote: [\[CITE\]](#) Great post, I feel the same way about this coin. Bought it on the Sale @ 7k Sats. Great Future ahead for VLX!
Can't go wrong at prices like these... can't wait for the ride ahead ?

mvmt - March 4, 2018, 10:26 pm

The potential for this coin is through the roof. Decentralized exchanges are the future for crypto, and getting in this early is a complete steal. Look at coins like Binance Coin, peaked at almost a \$2.5 billion cap in like 6 months. The next few months are gonna be a crazy ride for Velox

VarNull - March 4, 2018, 10:53 pm

Do you have any information on the team behind it?
I can't seem to find any information on their sites.

?Enlightened - March 5, 2018, 12:06 am

(Mar 4, 2018 11:53 PM)VarNull Wrote: [\[CITE\]](#) Do you have any information on the team behind it?
I can't seem to find any information on their sites.

They're releasing an anonymous, offshore exchange and decentralized wallets. It would be suicide for the team to post their info when releasing a product that disrupts centralized movements.

FaberCastell - March 5, 2018, 7:34 am

Might as well be giving money to a scamm. Where are the credentials?

Don't see no Github, don't see nothing. This seems extremelly sketchy. Why should i trust this?
Based on what?

Nvm there is a Github, will look into it.

VarNull - March 5, 2018, 7:42 am

Fair enough, I didn't think of that.

I expect the project to be open-source then, considering no one would entrust their coins on an exchange with no credibility.

Thanks

I expect the project to be open-source then, considering no one would trust keeping their coins on an exchange with no credibility.

Thanks

Exchange is anon and offshore
DEX wallet is open source

SIM-3323508 - March 5, 2018, 8:35 am

Its not even listed on CMC and it is only being manipulated on its "own" exchange lol. Quit shilling out your teeth son

?Enlightened - March 5, 2018, 8:42 am

(Mar 5, 2018 09:35 AM)MoneyManeLaFlare Wrote: [\[CITE\]](#) Its not even listed on CMC and it is only being manipulated on its "own" exchange lol. Quit shilling out your teeth sonIt got dumped by a early miner only an hour ago.

Quit your shit talk and go back to ripping people off with your signals bs.. Coin has been around for 4 months, and promoted on HF, one dump and all of a sudden bitches like you start to post.

+ It can't get listed on CMC cos it has its own exchange. New CMC listings need 1m+ volume, impossible for a new coin.

Grizzlies - March 5, 2018, 9:25 am

Yes decentralized exchanges are the future.

James Harden - March 5, 2018, 9:32 am

(Mar 5, 2018 10:25 AM)Grizzlies Wrote: [\[CITE\]](#) Yes decentralized exchanges are the future. Can't agree any further, they sure are!

Uh no - for coins to be listed on CMC you need \$50,000 daily volume - not impossible at all. List the coin on another exchange in the meantime then and lets see how much the price goes to shit. You can see the hole in the buy/sell orders from here.

?Enlightened - March 5, 2018, 11:29 am

(Mar 5, 2018 12:24 PM)MoneyManeLaFlare Wrote: [\[CITE\]](#) Its not a DEX though - CryptoBridge which runs off of BTS is the closest thing to an actual DEX which we actually have.

List the coin on another exchange in the meantime then and lets see how much the price goes to shit. You can see the hole in the buy/sell orders from here. Again. Wrong

1.

VBOLT - Anonymous Exchange

BOLTSWAP - Open-source DEX Wallet

2.

To list an EXCHANGE on coinmarketcap it is \$1m minimum daily volume. VLX is only listed on vlxexchange.com. The Exchange needs at least \$1m volume to be listed, meaning VeloxCoin can not be listed without a supported exchange (vlxexchange)

The project is a baby, 3 months old.

Again, go back to selling your shitty signals. You literally have no idea what the fuck you're talking about.

mvmt - March 5, 2018, 11:30 am

Modern day ebook seller = someone who owns a signal channel.

Don't even bother responding to the scrub. Invests in top 20 blue chips thinking he's wolf of wall street though doesn't have the balls to touch low cap coins because he's scared he'll lose the only \$2000 he has

G Eazy - March 5, 2018, 11:37 am

I will look into this coin now! Thank you for the post!

SIM-3323508 - March 5, 2018, 5:10 pm

No team listed on site - seems legit

The bids are half the price of the asks and are only available on the exchange they run (easily manipulated you put this on an exchange not owned by Velox and you will see it dump to shit) thats why I don't understand why you shill so hard on this coin unless you are given some sort of position or bounty for shilling.

<http://crypto-bridge.org/> has already accomplished what this exchange plans to

<https://coinmarketcap.com/currencies/bridgecoin/>
<https://coinmarketcap.com/exchanges/cryptobridge/>

What will set VLX apart? What network is it hosted on which makes it a DEX? Its own (aka VLX) which is a fork of what coin? Which btw that max supply is almost 5x as much a BCO do you really see the price surpassing \$2?

No white paper - just a test interface which you can use to buy VLX (w0w)

I have more faith in ALQO and their upcoming exchange coming Q2 (<https://bitfineon.com>) - <https://coinmarketcap.com/currencies/alqo/>

Thats fine you can talk about my signal group and attempt personal digs but remember you said buy francs lmao

(Mar 5, 2018 12:30 PM)Fade? Wrote: [\[CITE\]](#) Uh no, coins need to be on an exchange with \$1M volume AND \$50,000 daily trade volume for the coin itself. I'll hit you up after I cash out at x100 on this coin

You are so fucking dumb dude it's actually hilarious

1. they are not doing what crypto-bridge did. Crypto bridge is an online DEX

VeloxBolt is an anonymous exchange with over 200 pairs

BoltSwap is an open-source WALLET that has an in built DEX

2. You're saying because crypto-bridge made a DEX that can be the only DEX? are you stupid?

3. Why the fuck would you list a team for a project against centralization and authority? how many times do I need to say it?

4. It's a 3 month old, SELF FUNDED project. Less than 0.7% sold via crowdsale and you think they're just going to throw up a fancy WP and products instantly? They have gotten more done than any ICO that's raised millions in a 3 month period. Come on fool.

5. Lol, you are by far the dumbest skid on this forum. You run signal groups and promise to make people rich when really you just rip them off. Sad as fuck. I've made people that much money here it's ridiculous. You are nothing but a stain in the crypto forum with your signal threads ripping off newbies.

1) There is a thing called competition? The more competition the better products we get and at a faster rate.

2) They are breaking away from the centralized bs crypto is going toward, the idea is what crypto needs. Wait for their WP and I'll shit all over you and that question

3) what the fuck are you talking about. They have an SEC advisor. no one said they were ex SEC you stupid prick.

4) yah because you're too busy scamming people with your signal channels and dont make enough from said scams to participate in ICOs

5) You refer to a call I made around 2 years ago as your only defense when you're currently, in 2018, ripping crypto newbies off with bs signals. Yah you beat me good kid!!

Chief Sosa - March 6, 2018, 7:11 am

Too many decentralized exchanges coming up, prolly most of them will end up with no volume.

Each and every comment you make, makes you look even stupider. That thread was fucking hilarious though, props to you for showing everyone that you can actually reach lower levels of intelligence than you've already shown.

Stick to scamming on signals channels, than trying to analyze coins or making comments about other peoples threads. You seriously have no place here.

I'm not even mad you're accusing me of backing this coin either, because once it kicks off the only person laughing will be me, at you, while quoting this post.

how does this in any way compete against a project with the same marketcap (45 million) like ambrosus?

So the project includes detail in its roadmap?

VeloxBolt being a front and back end api? lol? Do you even know how building exchanges works or anything related to web development for that matter? Do you even know what an API actually is?

There is no such thing as a "front-end api" you clearly have 0 idea what you're talking about.

I'm not going to bother responding to the rest of that post, will take up too much of my time explaining every single error made in that post. "illiquid dex" "front-end api" "moved files to domain" was enough to show me how fucking dumb you actually are.

IPBC does not even deserve 4 million market cap and here's why in the first fucking sentence of their whitepaper:

"IPBC (Interplanetary Broadcast Coin SL) aims to disrupt traditional video sharing platforms with a blockchain-based payment system that rewards creators for fair use"

So in other words they are making a youtube clone with stricter publishing rules (lol, centralization?) and you get paid in IPBC shitcoin for following their publishing rules, which will not even be liquid enough for creators to actually cash it out into a currency that has monetary value.

Sounds like an absolute piece of shit comparing to a project aiming to solve a real issue in the crypto market right now being inability to trade without extensive levels of verification, or technical knowledge to use currently offered DEX's.

RUMRUN - March 20, 2018, 8:08 am

(Mar 20, 2018 07:29 AM)?Maximus Wrote: [\[CITE\]](#) one thinks the current exchange is a dex which just shows he has no fucking idea and the other one claims that this thread is the same as an ebook thread, when no one here is saying this will get anyone rich quick. Both as idiotic as you are, so it would not even be surprising if they were friends of yours.

I see that your signals group is a piece of shit but you don't see me crapping around in it. I can start if you want me to.

So the project includes detail in its roadmap?

VeloxBolt being a front and back end api? lol? Do you even know how building exchanges works or anything related to web development for that matter? Do you even know what an API actually is? There is no such thing as a "front-end api" you clearly have 0 idea what you're talking about.

wheres the team

for all I know its a little basement dweller like you typing this

DelziumTheProudWhale_temp - March 20, 2018, 8:11 am

(Mar 19, 2018 01:05 PM)?Maximus Wrote: [\[CITE\]](#) you getting all your friends to post? seriously. get a grip. you run signal scams and yet here you are getting your friends to shitpost on an altcoin thread. you are so sad dude.

+ lol? vac banned after the francs call (which btw, was 2yrs ago, yet you still love to use that as your only defense)? I don't think I have ever vac banned from this forum.

how do you get vac banned without using cheats

Seriously where the fuck is your logic at? How you can't work this out from face view is actually pretty ridiculous.

Where is the team of bitcoin? Still became a 150b market cap as of now with no more than a name created out of four technology company names behind it.

?Enlightened - March 20, 2018, 9:58 am

(Mar 20, 2018 09:53 AM)Bromden Wrote: [\[CITE\]](#) How about the team of Ethereum? Their faces are smacked right on the homepage, I dont see what's wrong with what he's saying he has a completely valid point.

He's suggesting that its awfully weird that not a single representative has come forth, which in his head probably alludes to an inevitable ICO scam.

1. Coin doesn't even have an ICO it's a self-funded project so obviously you've barely read anything in the OP. If this was an ICO I would not even be promoting it as most ICOs (especially ones without teams) are usually scams.

2. Ethereum wasn't designed to disrupt the banking/institutional world, it was designed for businesses which if anything assists the banking and institutional structure. They have no risk by putting their faces on the homepage. So no, he does not have a valid point and your ethereum point is also completely unrelated.

Why do you think Satoshi Nakamoto is in hiding and never revealed his/her identity? Because he created something that pissed off the banks and institutions. He/She'd be screwed in an instant if they found him/her.

RUMRUN - March 20, 2018, 12:10 pm

You have some nerve comparing this guy to Satoshi.

5 commits in 6 months time

Yeah. Okay.

?Enlightened - March 20, 2018, 11:08 pm

(Mar 20, 2018 12:10 PM)?nipe Wrote: [\[CITE\]](#) You have some nerve comparing this guy to Satoshi.

Yeah. Okay.

comparing? who the hell is comparing the two?

Their cause is the same. Same with all dex's, it's what satohis original vision was for btc. go ahead and look at satohis whitepaper if you have even looked at it before.

Again, veloxcoin is not the focus and the coin github will never be updated. This project isn't about the coin it's about the platform they are creating, the coin is nothing more than a share, just like binancecoin in binance. The coin isn't the focus in that project, the platform is, the coin acts nothing more than a share.

So now in summary from your most recent post you just told me that you have read absolutely nothing about this project and that you are here purely because of our past here on HF. All this time you thought this projects purpose was its coin, and not its platform. you're a fucking dweeb, wasted my time correcting all of your posts and bickering over this bullshit because you hold grudges and clearly have nothing better to do than trash my threads (similar to moneymane).

?Enlightened - April 18, 2018, 7:00 pm

Whitepaper release, new project site, and just announced supported on blockfolio...
Will update OP with up to date info when I am on PC

?Enlightened - April 29, 2018, 1:29 am

updated the thread will up-to-date info.

whitepaper, roadmap and project site have been updated since thread creation. Also now on blockfolio, delta and cryptocompare since thread creation.

things are moving!

Latest update from [BitcoinTalk](#)

Quote:Less than 5 days until the official VeloxProject.io 225k Sale!

[\[img\]http://#/JkugtB.png\[/img\]](#)

?Enlightened - May 13, 2018, 4:46 pm

bunch of new updates on bitcointalk, sale going live in 2 days as well!

THE NORTH FACE - May 13, 2018, 5:29 pm

So I'm confused. Is each VLX 0.0001BTC up to 25,000 or 0.0001BTC for 25,000 VLX? How are we supposed to get any if only 250,000 VLX are being sold?

Swip3r - May 13, 2018, 5:32 pm

think I'll stick with ZRX :)

?Enlightened - May 14, 2018, 1:58 pm

You've confused me...

If you're talking about the sale, the price goes up as the coins are purchased. If you are quick you get the cheaper price, if you're not you get the lower price.

225k total is being sold (25k total has been sold on discord and telegram for 9k sats already in a lottery sale)

only 18hrs till sale

MODERN - May 14, 2018, 2:02 pm

They have "plexus" type header, has to be legit :p

Also they have not touched their github in 6 months realistically

<https://github.com/vlxcoin/veloxcoin>

?Enlightened - May 14, 2018, 2:08 pm

Their project is not focused on the coin, it's focused on the development of a decentralized exchange supported wallet and anonymous exchange. This coin acts no more than a share, it is not supposed to be "touched" or developed.

RUMRUN - May 15, 2018, 8:49 am

Deadass project can't even communicate properly with the community.

The sale is one big fail

Nice project lol

?Enlightened - May 15, 2018, 10:33 am

Nice project lol

If I say "Yes I agree" will that stop you from consistently shitposting in my threads lol...

Anyway, cbf shit posting back and forth.

Serious question though, did you read the WP? If so, feel free to share thoughts as I am genuinely interested in your opinion considering your posts before the WP release.

BitLoops - May 15, 2018, 11:15 am

(Mar 4, 2018 11:26 PM)Fade? Wrote: [\[CITE\]](#) The potential for this coin is through the roof.

Decentralized exchanges are the future for crypto, and getting in this early is a complete steal. Look at coins like Binance Coin, peaked at almost a \$2.5 billion cap in like 6 months. The next few months are gonna be a crazy ride for Velox

I hear this a lot but look at it like this, whales do not give a fuck about DEX and once regulations come about DEX are going to be under high scrutiny which means greater risk. It may sound good in theory but my money will never see DEX's that'd be very poor risk management.

?Enlightened - May 15, 2018, 11:18 am

which means greater risk. It may sound good in theory but my money will never see DEX's that'd be very poor risk management.

You do realize the main aspect of DEX's is that they can never be regulated nor taken down?

BitLoops - May 15, 2018, 11:24 am

(May 15, 2018 11:18 AM)?Maximus Wrote: [\[CITE\]](#) You do realize the main aspect of DEX's is that they can never be regulated nor taken down?

That is simply not realistic though. Would you exchange high volumes on an exchange that is fighting legalities every step of the way? Of course not

gex231 - May 16, 2018, 5:46 am

(May 15, 2018 11:24 AM)BitBoss Wrote: [\[CITE\]](#) That is simply not realistic though. Would you exchange high volumes on an exchange that is fighting legalities every step of the way? Of course not

I'm not sure you understand out a DEX works.

?Enlightened - May 20, 2018, 2:23 am

less than 90k vlx left in the sale... and market price is higher than sale price!

Rublix - May 20, 2018, 4:32 am

I bought 27 vlx,my first cryptocurrency invsetment ,I hope it will pay off :D
