Thread: [New threads not showing in My Thread listing](#)

Armada - March 5, 2018, 1:12 pm

I made a thread this morning in the Lounge, went out for a while, came home went to go check it, and to make life easy and being lazy I usually go to my profile and just click Find all threads and look for the one I want from there, but to my surprise My new thread from this morning is not showing in the list.

Is this a bug, just happening to me? ?

Site glitched when you posted. I saw the thread that you're talking about and it said "Guest" made it

I guess it was a glitch.

I don't see any other threads that this has happened to.

You must have posted at the worst possible second. ?

Odd, alrighty...

Figured as much, just wondered if it happened to anyone else or not.

A link for me and I'd be able to fix it.

Fixed. As I suspected, the threads table didn't have your UID. Probably was writing your thread at a moment when the site crapped out or I was restarting MySQL.
