Thread: [Selling Linux IP Smtip Scanner + Bruter](#)

cwxnetwork - March 5, 2018, 5:58 pm

Selling a well working private coded Linux IP SMTP Scanner + Bruter works with putty on ssh tunnels few commands needed,

<http://prntscr.com/ine592>

Just put any ip smtp range and it will start scanning and brutin and will save the cracked smtps in a file,

Purchased it off in 2015 for around 1500\$,

Looking to sell it out for 800\$ BTC/XMR,

Can do escrow or MM but you will have to pay the fees,

Registered since 2014 wasn't active tho.

Send me a PM if ready to deal only.

?

sales009 - February 14, 2019, 11:40 am

this offer is way too expensive but if its still available do let me know

rutera_neo - February 14, 2019, 11:43 am

Can we get the price down a bit

tarakaske - February 14, 2019, 6:52 pm

Looks like scammer! Be carefull guys

whokid2017 - February 14, 2019, 11:57 pm

this is for free on youtube and note this dose not work well like it used to lol 800usd lol

I agree the price seems way too high. Be cautious.

humphrey1000 - February 24, 2019, 11:42 pm

i will show you guys my smtp scanner selling price is 70\$ usd, just load emails leads and install python 27.14 inside RDP.

click the start it start scanning. also u need to change your email inside crack.py file and put your email there to receive

good crack smtps.

this is domain smtp cracker.

pm me now
