Jim_The_Great - March 6, 2018, 10:21 am

Hello guys!!

I am looking for headphones and i could use some help...

The things that i am looking for are:

- 1) Durability
- 2) Clear and loud sound
- 3) Good bass
- 4) Wireless
- 5) Under 100\$

I want them only for music and movies not gaming purposes, over-ear are gonna be favored.

Thanks in advance!

Fire away ?

For your budget, I think skull candy would be cool. Idk if they are under 100 or near 100. I have the bose soundsport, its amazing. Check it out.

I also like Beats. They are comfortable with your ears.

they are when u got the one with a mixamp u can switch between 7.1 and 5.2 sound. I just use 5.2 sound. kinda sounds weird with 7.1 for some reason for me.

Most BOSE headphones are really nice and fit what you're looking for.

I remember a day when almost every one of these suggestions would be met by a bunch of butthurt backlash lol.

Who was that guy that was always perusing headphones threads and had that big sticky? Was his name M I X E D? Something spaced out like that lol.

Whatever you do, don't get razer kraken, I have some, and although I do like them, there are way better options for headphones.

Trapezoid- - March 7, 2018, 6:56 pm
