Thread: [\[Official Group\] Unity Recruitment \[#3\] Pentesting Challenge](#)

Crystallize. - March 6, 2018, 12:30 pm

Unity is currently Recruitment-Based Only

We are only as strong as we are united, as weak as we are divided.

Group Userbar

Forum Icon

Owner:RaZoR

Leader: Crystallize.

Requirements

- Must be active and participate in our projects.
- Must contribute to the group.

How to join!?

You'll have to bypass our website's security and put your name in the index page.
Many thanks to [Elitas](#) for making this possible with his awesome skills!

Start with this(just to keep lames away):

Code

```
ekpTOXg3YnZlODVpODRJV2hpTDVBVIBERVROVEVSUjVRQUwycytZbjFjMD0NCg0KMTI4IGJpd  
A0KYWVzZW5jcnlwdGlvbi5uZXQNCg0KS2V5OiBSZXF1ZXN0IG1ldGhvZCB3aGljaCB1c2VzIGZvc  
m1zLg==
```

Challenge:

- >Decipher URL
- >Successfully bypass our security
- >Upload PHP shell
- >Change index page containing ur name
- >Delete the logs
- >PM me with steps on how you completed it

Good luck, everyone!

Elitas - March 6, 2018, 12:33 pm

The challenge was really fun to make. You got my name wrong in the OP btw, there is an 's'. xD

Excited to see some members trying this web exploitation challenge out, I'm sure there are some talented members on here capable of accomplishing it.

?BowmanBot? - March 6, 2018, 12:36 pm

Unity is a great group, do not hesitate if you are thinking of applying!

Good luck to all applicants!

Speci4IK - March 7, 2018, 5:54 am

This challenge looks interesting :)

I'll do it when i have free time, now i'm very busy :S

PD: Now that the programming challenge finished, how the timestamp was found?

I'll contact RaZoR to release the solution.

Ganja - March 7, 2018, 8:41 am

Hoping to see even more talented members join Unity! Goodluck everyone.

SIM-2223238 - March 7, 2018, 1:18 pm

oooooh very interesting

at least it's not one of those damn 1 or 1 tasks which were annoying as fuck.

uhuh, are there files missing as it's trying to pull certain images but they got 404'd not sure if they're related to the test

You can PM me any broken images. They don't have anything to do with the test from memory, but I didn't think I had any broken pics.

Oh, the AES site isn't our website.

It's just a tool used to decrypt the message we left to get rid of undesirables. ?

What a cool recruitment process. Got pretty far and now my work blocked the website. Will have to wait till later.

Btw I forgot to mention in the OP whoever asks me for help will be blacklisted forever.
You are free to PM me if you are running in website issues (web errors or if you have any concerns)
DO NOT PM ME HOW TO SOLVE THE STEPS.

Yes, don't PM me either.

If you have any issues with the server itself, contact Crystallize.
If you believe it's an issue with the actual CODE, then please PM me. There shouldn't be any issues though, I've tested this numerous times.

[BLANK] - March 8, 2018, 10:39 am

Solved it for fun, took about 20 minutes but could have been quicker. Good luck all.

I think you're talking about the favicon, browsers will look for it even if it doesn't have one. If the error is a 404 error looking for a favicon.ico file there isn't anything wrong with the site.

I believe he was referring to the AES Encryption site, as they do actually have missing images.

I had the same error as he, but the images are displayed. I'll explain you in PM, i don't wanna give hints

Crystallize. - March 12, 2018, 8:05 am

Come on guys, keep trying!

ARIANA - March 14, 2018, 1:39 pm

Got as far as the admin login and cant really seem to get further :(

Thats the easy part lol.

I really wanna know what happened to those who managed to bypass our other challenge :)
Prove your skills now.

It's just basic bypassing..

ven0m - March 14, 2018, 11:52 pm

Managed to decrypt the url. This is my first try in such challenge. Also, got the 404 error in the favicon.ico. Good luck to everyone who tried and succeeded.

Elitas - March 15, 2018, 3:55 am

Please ignore any 404 errors. That has absolutely nothing to do with the challenge.
As for the admin panel - Lets say it's unbreakable (there are actually a few ways to hack our site, as demonstrated by another member of Unity, but lets pretend there is no way of hacking it). So, it's unbreakable. But there are some security issues/warnings with that login which would not be the best practice security-wise. Also, human error is at fault for a lot of large hacks.

Peace Security - March 15, 2018, 5:16 am

Good luck to anyone doing this challenge look forward to seeing new members!

Crystallize. - March 16, 2018, 7:04 pm

Funny nobody bypassed this.
It will be closed in 48 hours.

Fuck, i'll only have free time starting from Wednesday xDDDD
Well, i think i'll have to apply in the next challenge.

Good luck guys!

icy? - March 18, 2018, 12:26 am

Pretty sure I'm almost done, gonna keep cracking at it :D

Crystallize. - March 18, 2018, 12:59 pm

Giving this 24 hours more.
If you cannot decode the main part then here it is the domain: cesspool.ws

I was under the impression that Hack Forums has really smart hackers. ?

lol the decryption was the easiest part.

[BLANK] - March 20, 2018, 5:02 pm

Everyone please do not pm me asking for help or direction. This challenge is for you to prove your worth to UNITY, not prove that you can ask others how to beat a basic web challenge.

Crystallize. - March 21, 2018, 6:21 pm

Challenge is over and the steps were so simple

- 1) You had to bruteforce cesspool.ws/admin/
- 2) upload shell in the media part
- 3) cesspool.ws/uploads/
- 4) done
