Thread: [scammed by Brian O'Conner , uid= 2280213 for 500\\$](#)

Happened just now. I am up whole night just to write this.

Profile: <https://hackforums.net/member.php?action=profile&uid=2280213>

I wanted to exchange my AGC to BTC . I posted on a thread :<https://prnt.sc/invbwo>
He gets in touch with me over DM. I agree to go first since his "reputation" given by "HF" is so great!

His initial PM to me:

<https://prnt.sc/invcei>

We get ready for the deal and he asks for my BTC address.

<https://prnt.sc/invdwl>

I sent him the AGC code over DM.

He acknowledged he has received it and it worked.

<https://prntscr.com/invfkt>

I have since messaged him a few more times with my BTC address, and warning him of opening a scam report.

I hope you can help me Sir.

Regards

I am so sad I didn't do a check before selling. I was in a real hurry

I wonder after so much scams he has done why is his HF staff not doing anything. His reputations are still in the sky

300 isn't that much anymore, it's all about the ~1500 rep people that are usually more trusted.

Phone up Amazon and say that your AGC has been redeemed and tell them it got stolen.

Would that even work? Worth the try, but I feel like the OP is out of \$500.

Call amazon. They will fix it.

shazalamm - March 7, 2018, 4:01 pm

I did. they will reverse it in 24 hours
