DWC guys he also gave me little to no support. Even though he says not available he still selling it via discord. Vry sketchy i think its an old bot he found online

EDIT: OP is trying to trick user by saying he only sold me dream. WRONG he sold me BOTH and i got banned using rose, never even ran dream since it was detected. Just cause he made a thread with a piece of text saying unavailable doesn't mean he isn't ripping people off. either way no scam report because he is giving you something, that something being detected copy paste bullshit from online

I'm sick of this fucking user, lying and tainting my thread and spreading absolute bullshit. The user continues to say that I sold him two different cheats, which I absolutely didn't.

Proof I didn't sell him two cheats:

Check he only sent one payment from his wallet to mine.

For the claim I sold people Rose and I'm 'ripping people off' is absolute bullshit. Feel free to speak to the dev from the Ownedcore thread or from the 1st skype on muffinshop.net (edit: screenshot here proving Rose simply cannot be sold or run as servers are down <https://imgur.com/5bHfzXY> straight from dev) Prove to me you have a version of Rose on your computer that actually runs, oh wait, you can't.

Next, claims that I am selling a "detected, public version" of the cheat. Again, absolute bullshit. When you search "Dream Overwatch hack" on google the ONLY search actually related to the cheat is muffinshop.net (who I resell for). The cheat is extremely hard to get hold of and only a handful of sellers across the internet sell it. I say again, prove to me that you can find a version of Dream, undetected online. You can't, you can't even find ANY memory cheats that are undetected for under \$1000/month.

This faggot is next-level sales trashing and hates me because he can't read a fucking thread. All his claims are false and he is simply bullshitting potential customer. DEAL WITH EXTREME CAUTION if you ever decide to sell this moron ANYTHING. I can provide the full Discord log to any Moderator and anything else needed to stop this fuck from sales-trashing me or anyone else.
