Thread: [RSPLANET.ORG I UPCOMING RUNESCAPE BLACK MARKET FORUMS I](#)

LANCE - March 8, 2018, 5:35 am

This is still in early alpha stages I have spent a bit so far getting it running on Xenforo and the premium theme.

Just would like everyone thoughts and ideas what to add to this upcoming forums.

I have the funds to over do the advertisement and get some serious ranking fast.

Anyone willing to lend a hand or two.

Glad you're using Xenforo, i'm quite a fan of that forum software, Honestly, my thoughts are before you begin large scale advertisement try and get the forum semi-active with some friends & anyone else willing to help before spending all that money on advertisement, otherwise good luck!

Not much to judge right now but you should actually get a Runescape theme and you need to make it stand out I see no reason to move from forums like Powerbot and Sythe and join this one.

If your not going to say anything nice or suggest anything why even bother posting.

I just got Xenforo because of some of the latest features which are pretty decent. I would like to say thank you for your suggestion and this is something I have thought about doing before launching my SEO campaign, I wanna get content going and I do have a plan for that.

I had found a really good background image from a folder on my PC that was a wall paper and it suits it so good. Most people would say that, but ain't it better register early on a potential site that could end up becoming big that could end up making you money in the long run from gaining trust earlier than later.
