Thread: [ss7 attack](#)

hitmanabsolu - March 8, 2018, 5:00 pm

i need all tools for ss7 attack

Abstained - March 9, 2018, 8:20 am

We don't advocate fraud here, get lost.

UpTheCrust - March 27, 2018, 3:58 am

(Mar 27, 2018 03:53 AM)developer009 Wrote: [\[CITE\]](#) you can buy SS7 exploits and all required tools from hack-exploits.com i buy from him and working perfectly .

Thank you

Every post you have made on this forum is advertising that site. I recommend users DWC

I can help you with an ss7 attack tools but its not cheap?

do you have your own ss7 access?

contact via ICQ:725014787 if interested

Primary Ba - April 10, 2018, 9:11 am

Something I've read a little about but it doesn't really seem easy or doable on a small scale ?

It would be interesting to read more about it than the whitewashed hyped cnn version though

proofable - April 10, 2018, 5:04 pm

people still use ss7 attacks? I thought these kind of faded out?

Good day Sir, Can you perhaps assist me I went on your recommendation and purchases SS7 through hack-exploits.com and they gave me a coupon because i took 2 products and now they dont want to deliver the product because the consultant shouldnt have given me the coupon according to them. I am very disappointed. Can you please assist.

Thanks, i will look at DWC.

Someone replied saying "is ss7 still being used" that gives me the impression there is other easier ways. What would be the best way to get the location of a phone

CyberStrike - June 30, 2018, 1:47 am

You need an RTL-SDR dongle also or go big and buy a hackerone or whatever else you want.

<https://github.com/ernw/ss7MAPer>
<https://github.com/0x90/ss7-arsenal>
<https://github.com/SigPloiter/SigPloit>

As for tutorials you won't find much, it's not an everyday just let's pull out the toolbox and get to work just like yesterday. You need an understanding of networking and how mobile networks work. If you don't have an understanding then all the money you spend on a device for those radio frequencies is for not, you'd be better off taking the money contacting who ever paying them to buy the account or whatever.

First can you describe your environment? For example the sdr dongle involved, software used to scan and analyze.

See i want scan ip's with kali SCTPscan soft and i have problem with scan diapazons only scan ip if i write diapazons i see error segmentation

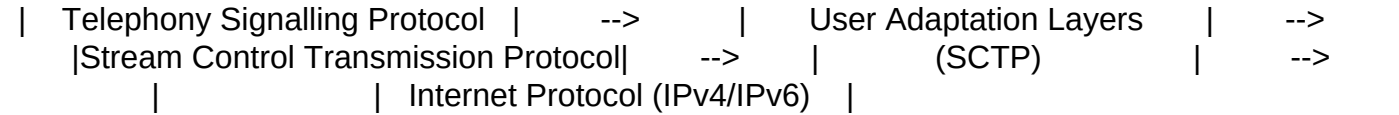

or light searc SCTP open ports in Shodan?

SCTP is a protocol to move ss7 data over TCP/IP, I suggest you read up on RFC 4166. From what I read it works as such

Does diapazons mean range, if so perhaps you are putting the range incorrectly. It'd help if you put the commands and roughly what your lab looks like.

mr_x_learner1234 - May 14, 2020, 9:15 am

whats this ICQ:725014787 ??

Themaling88 - May 17, 2020, 11:38 am

i want attack my wife any one can help me? hehehehe...
