I have a very specific graphic design in mind, if you have the right tools and experience it really shouldn't be too hard to make. Nonetheless, this is a PAID gig.

Requirements: Cinema4D (and know how to use it)

Photoshop

Experience

If you meet the requirements and are interested in designing this logo for the website, then please comment below and I will PM you with the details.

Thanks all.

Hey,

I am interested, send me details in PM :)

Thanks

I'm very experienced in both, can show examples of my work too.

PM with contact details.

Hello, I can most likely help you with this request.

Can you show me more specifically, what you're looking for?

Skype: zetzadesigns or shoot me a pm
