Thread: [HF Userscript?](#)

PrivateDonut - *March 13, 2018, 12:21 am*

Hey, I was wondering if anyone could make me a simple user script that will add a second "View New Posts" button right beside "User CP"? ? I don't know why, but it bothers me with it being on the right side. ?

I forgot to mention, I'm using Opera. Not sure if that matters. ?

Are you talking about HF forums or your own forums?

If your own forum, are you using MyBB as forum software?
