Thread: [If you could create any chrome extension](#)

Skidy - March 13, 2018, 9:44 am

I want to build an extension for Chrome for fun, I like to do different things in my spare time to unwind and want build a little chrome extension that I can call mine.

If you could have ANY extension, what would it be any why?

So far I was thinking:

VPN - A simple, easy to use VPN

Converter - Convert all USD to GBP (or other prices) on the page to make things such as trading Crypto-currencies's easier when it only shows dollars.

Random Photo + Sites - Just shows random photos and websites.

Site Safe - Tells you if a website is safe to use (not a phishing site or something)

I am accepting all ideas!

spradebassen - March 13, 2018, 9:49 am

So you've basically named everything we already have? Why not anything unusual?

I am trying to think of something really unusual, I have no idea really. You got any ideas? I want it to be weird but for at least 1 person to use it

Something thats lists the top News articles?

I would rather keep it clean please. Any other ideas?

what do you mean clean? that was honestly the best idea i could come with on top of my head

Honeybun - March 13, 2018, 9:56 am

An extension to brush Dickbreath's teeth would be nice.

In all seriousness - you'll be hardpressed to find something that hasn't been done in some way, shape or form.

I am not doing it for that genre, but making a "Who is this" extension where you can screenshot any persons face (celebrities, politicians and it shows their name and a little description) will be cool.

As long as you include porn stars, hell yeah, I'm game.

Haseo™ - March 13, 2018, 10:08 am

I don't want to make a suggestion to just have it shot down. Rip dickbreath's million dollar idea.

How would one monetize a chrome extension though (without getting them to actually pay)? Shove an ad in it?

Yeah, shove an ad in it. Just like I'll be using the extension to see who is having something shoved in them.

ven0m - March 13, 2018, 10:35 am

Can you create something similar?

[arget=new](#)

Random Photo + Sites - Just shows random photos and websites.

That got me thinking. You know what a DONG is? Search it
You can make an extension which contains a simple button which will randomly navigate you to one of these random/fun websites one can play with

It's probably very easy to create but why not

is this all of the most viewed headlines from the news sites gathered in one place?

Yes, and you can read individual news by clicking on them.

Ill code both when I get time, working on another project of mine. I will start on the "Who Is this" extension within the next 24 hours.

Give us an update when you have something to show off

Narrate - March 13, 2018, 1:59 pm

Let's be honest, no one's interested in any new extension unless it involves porn.

This. Good god please someone get this done.

Genoboy - March 13, 2018, 9:10 pm

make an extension that can make an extension

James Burnham - March 13, 2018, 9:12 pm

A snipta extension for faster conversions. A link expander extension for shortened urls.

Sagrav - March 13, 2018, 9:53 pm

A currency converter would be great, one that automatically converts necessary currencies into desired ones. I've ran a lot of trouble shopping in euros.

This could be pretty useful. I do a lot of converting.

Theocritus - March 14, 2018, 11:04 pm

Hmm i would like an extension that tracks how long ive been sitting on my pc so i know when i should stretch xd

JAS - March 17, 2018, 1:26 pm

Converter - Convert all USD to GBP (or other prices) on the page to make things such as trading Crypto-currencies's easier when it only shows dollars.

This is a fabulous idea.

BOBBY TARANTINO - March 17, 2018, 1:35 pm

An HF chrome extension with push notifications for messages/replies/posts. Post updates from members if your choosing. Etc

JoshAllen - March 17, 2018, 1:44 pm

One that automatically plays the new game called "Hackforums" for me.

Where you make posts and gain rep for no real reason.

you have never seen an extension like that? ???

Cammy - March 17, 2018, 1:54 pm

An extension that enables you to download Instagram livestreams straight from the Instagram profile

"b-but Chrome IG Story exists-

"No!"

it can't download livestreams only stories

?BIG Punisher™ - March 17, 2018, 1:55 pm

Something along the lines of doxing would be rather useful, any ideas off the back of this?

Like a thatsthem plugin?

Riot - March 17, 2018, 6:19 pm

An ad block that would block the ads.. EVEN ON NAUGHTY SITES. :)

Jink - March 17, 2018, 7:29 pm

More of a fun random idea but one extension that would visually inflate all the prices over the internet.

Thought about it once at work, I do sell hardware products, if a customer would point a price that could seem high from his point of view,

I could turn my computer screen to him with the extension activated and say :

"Look Sir, it's more expensive over the Internet, you sure are making a pretty neat deal in my own store"

Mr Meeseeks - March 19, 2018, 8:52 am

Maybe you could do something with AI to get personalized news reports for you from your browsing history?

Bos™ - March 19, 2018, 8:57 am

Im still thumbs up for that idea on pornstar recognition. All the other ideas are shit.
