Good luck with your business.

We can ignore spamhaus on our Russia Servers but will cost you. Our WAF protects against XSS, SQL, LFI, and RFI.

Layer 4 is handled by our ISP plus some of our own firewall rules.

Layer 7 is mitigated by us using different methods depending on the type of attack and the size of it.

Sir no one ripped you off. You kept telling us to configure stuff when your website wasn't even resolving to our servers but some vps from buyvm.net .

Your spamming of the discord chat + bad English (or any language) annoyed our staff members to the point one of them had to ban you.

? Sorry for not providing good service to your 1290308398% illegal website.

Violated terms of service but still let your site slide.

Really sad to know Shenron has been dead. Guys were kind enough to fight lots of fake complaint I'd been receiving.

Now they seem to be focusing on Sibyl offshore hosting. R.I.P.
