I loved you site's main BG! Do you have a bigger size of it? I'd love to use it on my UW display. ?

I like the "random" function. A nice idea.

Great site, I like it.

Any reason, why you disable right click on the wallpaper?

Mr Meeseeks - March 17, 2018, 10:55 am

Sweet site, I am at work right now, but I will definitely look around more and contribute some at home.

Maybe you could add some sort of thing where novice artists could upload wallpapers, and they could have a "choose what you want to pay" sort of deal to have content on your website, and possibly some money for the beginning artists

Looks good. I'm not sure if Chevereto supports this, but maybe make the url's more SEO-friendly, it'll help your google-rankings.

No problem, I think it would be a good idea for both you and the artist.
