Mortalis Piratica - August 1, 2010, 3:02 am

Hey Guys Here Is How To Post In Locked Threads (I Will Show You Hack For Hackforums.net To Post In Locked Threads).

Step 1: First Click On Any Thread (NOT LOCKED ONE) Now View Page Source And Save It Into Your Computer As Test.html

Step 2: Open Test.html With Notepad.

Step 3: Now Find "newreply.php?tid=" And After tid= You Will Find Numbers Like 574058 Or Any Other Number (This Numbers Are Used As Thread Number Like Thread Number 40000 Or 574058).

Step 4: Now Open Locked Thread And Copy Its Number In Address Bar After [https://hackforums.net/showthread.php?tid=\[Thread Number\]](https://hackforums.net/showthread.php?tid=[Thread Number]).

Step 5: Copy And Paste The Number After "newreply.php?tid=" In Editing Of Test.html And Save It. ?

Step 6: Open Test.html And Write In The Quick Reply Box Any Message Click On The Post Reply Button And You Will See Your Message Was Posted In Locked Thread. Woho ?

I Tested This On AmroGames Too Works 100%.

Well it obviously varies based on forum software, since not all forums are the same...

Mybb: Code newreply.php?tid=IPB: Code

index.php?app=forums&module=post§ion=post&do=reply_post&f=[FORUMID]&t=[THREADID]

Vbulletin: Code newreply.php?p=[POST/THREADID]If you want me to find another one just let me know

Ironsides - January 19, 2011, 3:08 am

Hmm seems to be impossible, this is the way it looks:

<http://www.hiveworkshop.com/forums/tutorial-submission-283/how-properly-format-tutorial-please-read-before-posting-119320/>

The thread title is in the url etc, meaning it wouldn't work.
