Thread: [GIF Avatar not animating. Am I the only one?](#)

Also why can't we use other host for our avatar? I only can upload it.

Or is it disallowed now to have an animated avatar?

What's wrong with uploading it? Why do you need to host it yourself?

**Charger** - March 16, 2018, 10:51 am

It has to be below the file size and other listed requirements or it'll resize and not work.

Your gif for your avatar and signature are both animating for me, unless you're referring to another one.

I thought maybe because of this it wouldn't work. But I my gif was just to large, so it works now ?

Yep it was 1kb to large lmao, but it seemed to work.
