Thread: [Is there a tool to make my .exe startup and process protection?](#)

Playful - March 17, 2018, 5:53 am

Or how to make .exe startup and process protection?

Jacque Fresco - March 17, 2018, 6:59 am

This kind of Post will attract scammers that may will harm you. Please teach yourself in this topic and come back with more expanded knowledge. Hint: Try a Programming language and learn how loop works and what.. if `ProcessExist("malware.exe") = 0` Then `ShellExecute("Malware.exe")`... means (:

ZERO2SIX - March 17, 2018, 7:25 am

or just buy a crypter.. if u want to code it yourself this is wrong section.. and just google about adding startup

A better way would be storing the EXE encrypted in memory instead of a simple storage. (Disk)

Make a guarding process which is not a child process!

Yes but the answer is for the beginner which do not much know about memory and stuff i guess, so to be to complex is not good for his understanding
