Thread: [The truth about data protector](#)

Shadow4133 - March 17, 2018, 12:17 pm

Data protector claims to be the best crypter, well to some user it may be ... but to some he the worst and most arrogant developer to deal with.

What about his online support?

His FUD come once in three week and his FUD last 6hrs only the detection gets high.

wen you write him to ReFUD his crypter he will insult like he gave you the licence free.

Wen you ask for little support he talks to you like he bought the PC for you.

I bleive some people has left his product for people reasonable and strong file protector ..

NOTE: if your Data protector user, just note that the chances of your file been protected is 20% that mean after some hours your file becomes vounerable and uprotected, detectable by anything

He has this insulting habbit, i think that guy needs rehab on how to socialize,

Data protector has failed he just has past glory..its not compatible with many files, Hes just ripping people of there \$\$\$ for no good service rendered.

Also he seems to be collecting information of customers, because you need to provide your HF profile link in order to purcashe the crypter, which is more than very suspicious.

regards
SMART-POISON

"His FUD come once in three week" well judging by his thread(<https://hackforums.net/showthread.php?tid=5798806>) he seems to update the stub roughly every 3-4 days.

"wen you write him to ReFUD his crypter he will insult like he gave you the licence free." well no shit it takes time and effort to refud a stub on top of that I assume that he's probably tired of kids asking the same question over and over.

s??I?s? - March 17, 2018, 3:17 pm

user like you,who have no idea about anything and anything just speak bullshit.

Read cryptor bible to get at least a small idea about how anything works.

And if you cant use data protector,you cant use any cryptor in the world.

you will always end up complaining.

MorbidlyObeseCat - March 17, 2018, 3:21 pm

I am of the personal opinion that the developer on there can be quite rude. However this is merely personal opinion. Because of this I believe many user's of HF go with a different crypter because of it. Owner of DataProtector should simply ACT nicer. More people will buy his stuff that way.

Weezyfx - March 17, 2018, 3:26 pm

I use the Topher crypter

ImSimplyNameless - March 17, 2018, 3:28 pm

Cool story what does this have to do with DataProtector

Purple Kief - March 17, 2018, 3:42 pm

Actually DP4 without a doubt is one of the best crypters currently available for detections. That excludes ESET.

It's true that n0s likes to insult his customers and should calm down a little, regardless if you learn to use the product it's more than decent.

Good luck, take this to the crypting section this does not belong here. Maybe even marketplace discussions.

i understand how everything works, and i have used a lot of crypters in the past and now i use spartan crypter and it works fine

i am not complaining, dont get me wrong, im just warning the community about data protector and its developer arrogant kid

Fulya Donmez - March 18, 2018, 2:17 pm

My opinion

Is he rude? answer: YES

Is his crypter fud? Answer: Yes

Is his crypter prize good? Answer: Yes

Know offense guys just my opinion.

Sickness - March 18, 2018, 2:56 pm

I also get mad at my customers many times when they dont understand something so simple but its normal mate.

(Mar 19, 2018 02:39 PM)Fictional Wrote: [\[CITE\]](#) This is why I would use DataP over any other

crypter, so that retards like you that scan their files in virustotal get filtered out by this savage developer that don't do it only for money.

If I'm correct, he's only collecting HF UUIDs so that anyone blacklisted doesn't get their hands on it and fucking destroys the FUD rate. Which happens often on other crypters that don't have control over who's buying the tool.

are you trying to say that im scanning files on VT ? :D lol

Blood-Stone102 - April 4, 2018, 5:18 pm

well my experience says different. its a great tool data protector is the best in HF. i don't know what u talking about

Hello there

i was wondering if you knew how much and where i could purchase the data protector crypter. i am looking forward to hear from you. Thanks

This is exactly the truth. Most people who complain are actually the cause. Like this moron.

Blaqmontana - March 18, 2019, 4:51 pm

Please guys I want to know if data protector is good for Azorult bot

Why you just don't ask the owner of data protector instead? He might give you more accurate answer than us.
