Thread: [SOLVED](#)

v3rtices - March 19, 2018, 7:42 am

Turns out the LTC blockchain synced in my computer and took all of my filespace

Wires - March 19, 2018, 8:10 am

I'm Wires, I'm one of the students of the Security Malware Removal Team and will be assisting you throughout this thread. Before we start just take a second to read through these few requests - these are to ensure we can help you quickly and safely: Only use this thread for help. Please don't create multiple threads, accounts, PM me or post on other forums - if you do just let me know.

Only follow my guidance.

Don't run tools I haven't asked you to run. If you do just let me know so I can take that into consideration when viewing logs.

DO NOT install any other software while we are attempting to clean your machine. It can get quite confusing especially if you are downloading questionable tools.

Please be prompt in responding. I'll do my best to do so. If 48hrs has passed, please either PM me or ask "Are you there, I still need help" in this thread.

Please stick with me until I give you the 'All Clean'. I'll help you cleanup quickly and offer some tips to make you more secure and get your system running faster.

Your malware related tools will be removed. I don't support the tools often distributed on these forums. Scanners will generally remove these - I take no responsibility for any malicious software that is lost.

I (nor does the forum) do not support pirated software.

If you don't understand something, don't be afraid to ask - I'm here to help. ?

You'll notice the logs are pretty big and you won't be able to post a reply containing it all. Please use ONLY either: <https://hastebin.com> - here you can upload the .txt file directly. - I prefer this.

<http://pasted.co/> - here you can set a password if you wish to protect your data. Just PM me the password.

And paste the link to the logs in your reply. Post each log separately (each with a separate link). If you're a new member and can't paste links you can fool the forums system by removing the beginning of the link.

e.g. If you can't post this: <https://hastebin.com/raw/epaduvuyic>

Post: I used hastebin, here is the ending /raw/epaduvuyic

If I request you to post an image please use a service like <https://imgur.com>

=====

Download the right version of FRST for your system: [FRST 32-bit](#)

[FRST 64-bit](#)

Note: Only the right version will run on your system, the other will throw an error message. So if you don't know what your system's version is, simply download both of them, and the one that works is the one you should be using.

Move the executable (FRST.exe or FRST64.exe) on your Desktop

Right-click on the executable and select Run as Administrator (for Windows Vista, 7, 8, 8.1 and 10 users)

Accept the disclaimer by clicking on Yes, and FRST will then do a back-up of your Registry which should take a few seconds

Make sure the Addition.txt box is checked
Click on the Scan button

On completion, two message box will open, saying that the results were saved to FRST.txt and Addition.txt, then open two Notepad files

Copy and paste the content of both FRST.txt and Addition.txt in your next reply
