That's actually pretty sick, what'd you design it in?

I drew it by hand and refined it in photoshop. ?

The design Would catch peoples eye from a short distance, they would probably buy it off the rack, but it would definitely blend in with a wall of hot topic tees... But hey.. variety is the best part of life!

I would rather not share short urls here. Just post the image directly in your post, most people won't open a short url.

cool design, dunno how I feel about the 'pencil' look, but overall the design is cool. Nice work !

Looks strange in the way that you'd keep your eyes on it for a while.
It's very creative but I don't personally see people wearing it irl.

The Purple Joints shirt is lit tho!
