Thread: [Simple Logo Rip and Website Header](#)

Almonds - March 20, 2018, 9:16 am

Using these as a template - <https://imgur.com/a/dfSQf>

Create a Simple Logo for an instagram profile photo

Simple Header image with logo, white background for shopify (I really don't mind)

A favicon of the logo if you are an absolute beast.
Feel free to recreate or add your own renditions where you'd like.

Regardless, anything is appreciated.

Cheers,
Almonds

You could be more supportive towards the last submission.. With your attitude, i doubt anyone wants to spend their free time on you.

I was appreciative to the user via Rep+, but I am looking for someone to spend a little more time and effort towards this.
