Thread: [Just Played this in PlayStation VR and it's Ridiculously Scary](#)

Just played through the whole of this and wow, I was bricking it haha. I love horror and love to be scared, but this took the piss a little. It would have been all well and good but with with the VR combined with my TB's with "Super Human Hearing" on, it was WAY more immersive than you see here.

Horror Games with VR surely brings the chills while playing.

Your Thread tempts me to buy a VR for my PS4, hope I will get one as soon as I can afford one ..lol

Also I wonder if my PS4 support VR . hmm

Need to do some researching first I think

All PS4s support VR AFAIK, just Pro can do it better.

That's fucking awesome, glad you enjoyed it as it means maybe I will too. I love the idea of horror games and especially with VR I've been looking forward to any good ones.
