Thread: [>> SHELL GAS CODES | \\$4-\\$5 OFF A GAL | BTC/PP/ETH <<](#)

Möngool - March 20, 2018, 5:15 pm

Anyone that's having problems with codes please have patience I am others are trying to resolve issues with the codes. A new method has been tested and we will see if codes are in tomorrow. If everything goes right I will have replacements for anyone that's bought, we are not doing refunds as stated in the TOS. I hope everyone who's purchased understands its out of my hands for now. I am a good guy, I'm not trying to get over on anyone. I will replace everyone's code once we get this sorted out!

[/align]

T.O.S

- if this method stops working it's not my fault.
- this is nonrefundable, you have a warranty for replacements.
- if you void your warranty, we have all rights to decline a replacement request.
- T.O.S can be changed at anytime.

So if I buy a code that has 5-6 off up to 20 gallons I just use the code when getting gas, then next time use the same code again to use the rest? If I don't use it all can they still be used until it doesn't work anymore?

This is correct. If gas is \$2 a gallon and you have \$5 off you will get 20gallons for free. That will leave you with \$3 off and you can come back and fill up another 20gallons.

Well heres my math tell me if I'm wrong.
The codes work up to 20 gallons and gas is \$2.50 where I live.
 $20 * \$2.50 = \$50$

so essentially if you do use all 20 gallons you're saving 25\$ dollars.

End1ess - March 26, 2018, 5:48 pm

im confused.

20 gallons of gas cost me 50\$

if i buy one code for 25\$, how much would i pay to fill up my remaining 20 gallon

Now double that because these codes are \$5 off so you save \$100 :) (you can come back again

Gas here is anywhere from 2.20-2.90 a gallon usually, so how would the 5 dollars off per gallon affect the price since it's already below 5 dollars?

Okay I don't have access to the selly, it's not my selly. My selly is "hendrick" I do not have access to

codes for replacements the TOS says no refunds so you will have to wait for a new method to be found and fresh codes to be given for replacements. Shell patched the recent methods of acquiring these codes which in the TOS I stated if this is to happen, It's not my fault.

At the same time the codes do not last, most of us that received the error had to just go ahead and put gas in our cars. When we texted you , you didn't respond so now we will be stuck with nothing. You said you will replace the code within 12 of purchase, I understand where you are coming from but most of use already had to purchase gas so now getting a code replace would be useless because its going to expire soon as we receive it . It would have been better if you would have just responded to the PM tbh .

If the method works, codes shouldn't expire like they have been. Shell has detected them and deleted the accounts that's why everyone is getting the error "account not found" I understand everyone's frustration and I'm trying my best to fix this. I want this resolved for everyone, this has turned into a huge mess!

No refunds are being given out. The method isn't patched, got one code tested and it worked. Waiting for partner to get home to get replacement codes! I am held responsible for the replacements like I've said. Still waiting on my replacement or a refund, it's been a couple weeks since I ordered.

If you are selling a product, regardless if it's for someone else, you are putting your rep at stake. As of right now, you have several unhappy customers waiting for replacements/refunds. I'd address this ASAP and then probably not agree to sell someone else's product again.

And even if your terms of service say no refunds, if you sell a faulty item or bad code, that doesn't mean shit. That's a scam lol

So you're mentioning what your buying? I am not on my computer so discord isn't an option for receiving messages. I didn't promise anything. When you say sold as is, you're assuming that the code works!! I'm not gambling here, I'm giving you my money assuming that I'm going to get a working product.

That's a problem about reselling, you technically are responsible for these codes since you sold them to people. Even if you didn't actually make them. I honestly think the no refunds at all in your TOS is retarded. What if your method got fully patched and you couldn't find a work around, what are you gonna do? Just basically scam everyone since they won't get any working codes or refunds?

It wouldn't be scamming anyone if they read the TOS before purchasing like you're suppose to you are agreeing that you are taking a risk when purchasing if the method is patched you will not get a refund. If you don't agree to that don't purchase. I'm trying to get everything resolved.

You choose to be a reseller so you take that responsibility. Doesn't matter if you make \$1 profit off of each code. If someone buys a code from you, you are responsible for the whole code and amount paid for it. You are not just responsible for your profit you're making. It's like if you're buying supreme to resell and you sell to someone and it has a tear in it. You take the clothing back and give the person a full refund, not just say I will only give you a refund of the profit I made from selling you it smh

If someone buys a code from you, you are responsible for the whole code and amount paid for it. You are not just responsible for your profit you're making. It's like if you're buying supreme to resell and you sell to someone and it has a tear in it. Im gonna have to upload proof to PayPal of TOS agreement and you'll have to upload proof of the code not working and we will see who holds up.

Even if you upload proof, doesn't matter, buyer is always protected and this is a Greyhat product that you can get in trouble for. You're just in a bad situation atm mate and doing business with unethical vendors.

actually you are wrong, buyer is only protected for non virtual goods. Technically this is a virtual item since it is just a code.

Nice message you sent to PayPal. Here's a link from PayPal about virtual goods:

EDIT: Also, thanks for admitting to PayPal that you actually didn't deliver it.

Are you dumb, you purchased on autobuy I can screenshot the order with order ID and the code that was delivered to your email.

When purchasing something if you can't agree to the terms of service just don't purchase man.
