Thread: [\[\\$20\] Phone Call Spammer Script | Disables Any Phone! | 24/7 Support | \[Autobuy\]](#)

the6ix - March 21, 2018, 5:24 pm

I'm selling a Phone Call Spammer Script.

It's all coded in PHP and very simple to use!

I mainly used this for US and Canada, but you MAY be able to do this in other countries. I am NOT sure.

What does it do? Sends mass amounts of phone calls to your desired phone number.

- 1) Enter the phone number
- 2) Enter the amount of times you want to spam the phone number
- 3) Submit the form
- 4) The number you entered will start getting calls instantly, and every 3-4 seconds a new call goes through which makes their phone unusable.

Requirements,

Website hosting or you can set up XAMP on your computer to host it on localhost.

* An additional \$20

I have included strict and direct instructions on how to set this up, but if you need any help; I'm here!

I offer 24/7 support, and will help set it up on your computer or hosting within minutes.

Purchase now,

[\$20] <https://selly.gg/p/8f311321>

PayPal, Bitcoin, and ETH are accepted!

Terms of Service,

No refunds under any circumstances.

You will NOT leak or share this script with ANYONE.

Disputing the payment will result in a scam report.

I reserve the right to change the terms of service at anytime, with or without notice, for any reason I deem necessary.

I am not giving any Vouch Copies away for the script. But I will show you that the calls do come through and do spam the phone.

Can I see a sample? I'm interested. I coded something like this a while back and would like to have something like this in my pocket.

Donald Trump Jr. - March 22, 2018, 2:38 pm

Would love some type of sample contact me if possible.

Can I see the demo hosted somewhere? Also do you accept a middleman till the script is installed and fully functional?

blackknight_ - March 23, 2018, 4:42 am

Could you make a video and show us you inserting the number in the webpage and your phone being spammed?

Check out my other thread where I sell access to the spammer.

<https://hackforums.net/showthread.php?tid=5814499>

Other users have posted vouches and one even showed a screenshot of the calls.

The website <http://smmpanel.pw/spammer> is using the script I'm selling.

the6ix - March 24, 2018, 10:16 pm

The script to my Phone Call Spammer/Bomber is still up for grabs!

the6ix - March 27, 2018, 7:54 am

I have updated the script a little bit, and it is still for sale!

Very easy to understand and get set up on your own.

itsMeCherry - March 27, 2018, 10:09 am

I know the script is in php but what api or software you using to actually execute calls. Php does not have functionality to make physical calls to any number

That's why you also need a \$20 investment after buying the script.

Just purchased this. I must say, it was well worth it.

I had an issue on my end (I feel kinda slow because of how simple it was), he fixed it in no time at all.

tl;dr would purchase again.

10/10

Thank you so much for purchasing! It was a pleasure dealing with you.

Frankstare - March 30, 2018, 12:09 pm

Do you think the \$20 investment needed to get the call system to work would block something like this?

Yes, the script will allow you to spam UK numbers.

I live in the US, so my script is set up to USA only.

dmaphia - May 18, 2018, 6:30 pm

Would the person getting spammed be able to figure out who is sending the spam calls?

bobbyntigers91 - August 27, 2018, 2:15 am

What number does it come from? Only 1 or multiple? or are they spoofed?
