Thread: [Vulnerable sites?](#)

SIM-3487621 - March 23, 2018, 7:17 am

Hello HF users

Can someone tell me what sites are vulnerable to sql injection? For example i know that some sites with php?id=1 might be injectable..any others?

Thanks in advance

I realize I'm really really new here, so I'm sorry in advance if this is a totally idiotic question, but I can't get that website to work. Do I need to do something besides copy/paste?

how can someone find sql dorks easy other than google

_____ - April 26, 2018, 1:26 pm

copy this into google:

inurl:login.php?id=admin

One of my own and personal favourite google dork to use

If you want to dive into sqlinjections, google 'sql injection attacks and defence'

You'll find a ebook and could get the basics

Buy SQLIdumper from fLaSh .

You can also use it for blind injection.
