Thread: [\[AUTOBUY\]\[Lifetime Builder\] Apollo Miner - Hidden Cryptonote miner](#)

**kent9876** - March 23, 2018, 8:13 pm

Apollo Miner is the most priceable cryptonight miner on the market. The beautiful builder interface and total nativity of this miner give you an incredible experience of mining.

### APOLLO MINER

The best miner of our own production which was created to start making money in the crypto-industry

Just forget about that 'pay-per-build' system now you have a unique option to buy a total lifetime subscription with updates and supporting.

You just need to make a build and start spreading your build all around the globe.

We have already working for 6+ months and lots of updates already pushed out. When the new update arrives you will receive a message from the bot where you will be able to see what was changed, fixed, added to the new version. Also, you are able to offer your own feature that you want to add to the bot, other users can become a contributor to this new feature and gain 'extra-rep'.

We mine every cryptonight cryptocurrency from ByteCoin, AEON up to MONERO and other cryptos on this algorithm.

Features that miner already has:

1. Lifetime builder, you are able to use the bot all the time its ONLINE. The bot is located in the Telegram.
2. Coolest persistence, dir blocking, explorer window checking, multiple startup points and other nice features that must prevent manual deleting of a miner.
3. Easiest config changing, you can change your mining credentials at any time on your own host and your slaves will start mining with new credentials. Also you are able to set power of mining there.
4. Reserve credentials, if your host with config will be dead, the miner will start mining with your reserve credentials which you can set on the build process.
5. IDLE feature, you are able to set power of mining on IDLE and time of IDLE checking.
6. Always supported new algorithms, you are able to change your mining part on your host, so your old bots won't go on algorithm changing.
7. Proxy username randomizing, if you are using proxy-miner you can set proxy username

randomizing to see your bots per wallet.

8. Total nativity, the miner has been written in the C++ without any dependencies.

9. Stability, the miner is totally debugged and works flawlessly without any errors and issues.

10. Chat with users, where you can have a help from our big community.

I have received my vouch copy and I'm leaving my review:

Firstly I want to say the seller answered me right away and was very polite which is always a plus, the entire process is done through Telegram and it was extremely easy to set up, builder worked great and the seller helped me out with every question I had.

There is also a Telegram chat with updates, always a good thing.

Hashrate was nice and the build itself worked as intended.

Overall I'm very satisfied, and the price is also very good.

I vouch for him and this product! (:

(Mar 26, 2018 12:16 AM)dogyuun Wrote: [\[CITE\]](#) OP gave me a vouch copy, heres my review.

The telegram builder is very useful, it walks you through the steps of what you need to set up your build. Simple stuff executed well.

The owner/programmer is polite and patient, responded promptly to my first message and answered questions I had about the miner and seems dedicated to this project. There is also a telegram chat where he posts changelogs and updates which is pretty cool.

I executed the miner on 30 bots or so and got a really great execution rate. Hashrate is good. I'm impressed and this miner is a steal for the price he's offering. I've bought miners from this section before that were more expensive and a lot worse. The CPU+GPU option is awesome and I haven't seen other miners with it for xmr. The cpu is also good since its 32 and 64bit.

Overall, 10/10

OP is a new member but I had a wonderful experience testing this out and its working flawlessly. Recommend this.

(Mar 25, 2018 08:59 PM)Hydra Wrote: [\[CITE\]](#) just finished testing the builder and miner. the builder in telegram is really easy to use and has a lot of features and more features are getting added relatively fast. the miner works really well along with all of the other add on features that you could use with it. the owner is also really helpful with problem solving and answers extremely fast and is on most of the time.

Would love to test this out. Send me a PM if interested

**kent9876** - June 6, 2018, 1:20 am

OFFICIAL POST OF RELEASE!

What was changed?

(-FCK,EVERYTHING)

- Size, it's gone. Miner had a big size(around 2mb), now it has a little size ~100kb.

- Persistence, now miner is strongly persisting on the system.

(EXPEREMENTAL)(x86) If you will try to delete a miner, it will be restored.

- CONFIG FILE, this is a cherry on a BIG bunch of updates, now miner has a dedicated config file, where you can set settings for the mine-process.

- (EXPEREMENTAL)(X86) Self-Update, it is currently working in the test-mode only on 32bit systems, if miner on the host different between miner on the disk, miner would update himself.

- Detecting of a task-managers, improved algorithm of task-managers-detecting, now miner will NOT work if victim OPEN AND USING any task-manager.

- Drops on the disks, now NOTHING is dropping on the disk, all miners only containing in the memory. So, you just need to crypt only ONE file.(FILE-LESS MINING)
- Privacy stuff, all your entire data(links,addresses) encrypted within a miner and decrypting only in the memory.

REBRANDING OF A MINER

NOW MINER'S NAME IS APOLLO

PRICE INCREASING

NOW CPU/GPU VERSION COSTS - 32\$

CPU + GPU - 65\$

This is just a builder you need to have your own GPU/CPU miner so then you can use it to build it ?

**kent9876** - August 1, 2018, 6:24 pm  
(Aug 1, 2018 01:02 AM)Deflate Wrote: [\[CITE\]](#) This is just a builder you need to have your own GPU/CPU miner so then you can use it to build it ?  
Hi Deflate.

No, you dunno need to have your own miner. You just need to build a build on your own.

(Jul 31, 2018 07:49 PM)ren1871005jiba Wrote: [\[CITE\]](#) PM me    Telegram    @Renjianxin  
PMed

**kent9876** - August 3, 2018, 1:17 am

- Added build unicalization(every build would be unical for ~94%)(x86)
- Changed a few things in startup routine
- Miner now support Windows XP and Windows server 2003
- Added Anti-VM(for AVs)
- Added Anti-Debug
- Added fix for bitten registries
- Deleted %WinDir% from drop-path(sometimes caused issues cuz of privileges)
- Added example of an iplogger link
- Changed FAQ page

**jontstaz** - August 3, 2018, 2:49 am

Hey bro. Let's say I ran this on 500 PCs, what sort of profits would I be looking at? Just an estimate based on average PC power.

**kent9876** - August 3, 2018, 6:33 am

(Aug 3, 2018 02:49 AM)jontstaz Wrote: [\[CITE\]](#) Hey bro. Let's say I ran this on 500 PCs, what sort of profits would I be looking at? Just an estimate based on average PC power.

Let's say that average PC give 60 H\s.

$500 \times 60 = 30.000 \text{ H\s}$

And according to the site cryptocompare.com. That 30 kH\s would give you around 660\$ every month.

### [Proof Of Concept](#)

**Parasiteman** - August 6, 2018, 5:44 am

How long does it remain fud? How often do you update it? Do we have to buy the updated builder each times? Can we use private crypter without causing errors?

**GunsAndDragons** - August 7, 2018, 5:54 am

I would like to know a few things. Can we modify the power of the miner, Also is it built to mine more when the pc is not in use? It would be cool if we could remove the miner from infected device and then up the hashrate

(Aug 7, 2018 05:54 AM)GunsAndDragons Wrote: [\[CITE\]](#) I would like to know a few things. Can we modify the power of the miner, Also is it built to mine more when the pc is not in use? It would be cool if we could remove the miner from infected device and then up the hashrate

So I just build a basic file then deliver it to my devices and your miner will detect all the info cpu + gpu and start mining?

I don't want to make a lot of different builds for each device

**freetopay** - August 7, 2018, 7:32 am

look nice ill add it to my list :)

**kent9876** - August 8, 2018, 6:24 pm

It's FUD every update or cleaning. Usually I update it every week with fixes and new features. No, builder is giving for a lifetime period, check out the thread before asking. Yes, you can use your own crypter and if it will cause errors - I will fix it =)

(Aug 7, 2018 05:54 AM)GunsAndDragons Wrote: [\[CITE\]](#) I would like to know a few things. Can we modify the power of the miner, Also is it built to mine more when the pc is not in use? It would be cool if we could remove the miner from infected device and then up the hashrate

My miner is a SILENT MINER, so you don't need to make a build for every device :lmao:.

Yes, you just need to make a build and then just spread it.

**zelvak** - August 9, 2018, 2:38 am

hi,

Have an ability to update itself from the host. What does it mean?

It's autoupdate and FUD autoupdate for every bots on victims pc?

thx

**kent9876** - August 9, 2018, 3:13 am

**Invicious7** - August 11, 2018, 7:30 am

Review Post for Apollo Miner

First off, to summarize, this program is amazing and does exactly as described.

Delivery: 10/10 - Automatic as described and completed within an hour.

Ease of Use: 9/10 - The builder is very straightforward with multiple examples showing how to fully setup and/or correct any common issues you come across

Technical Knowledge Required: 6/10 - Moderate computer knowledge required for creation of personalized wallets and basic crypto coin management. The guides/videos provided are all inclusive that there arent any questions left for the customer to figure out.

Execution: 10/10 - Single click execution with very strong persistence. 17 out of 18 nodes connected on the first try and are still at 100% uptime since then.

Customer Support: 10/10 - goes above and beyond to help customers. Any questions have been fixed/addressed within hours not days.

Miner Performance: 10/10 connects and runs miner as if i put the miner on intentionally. No performance lag.

I combined my build with the waveloader and added a few features to the virus to help spread it much easier. i havent had the chance to test it indepth but from the first 3 executions they have worked, and are still connected. It was significantly easier to use Waveloader then to use my older methods i have.

Thanks for a great product and I look forward to your future developments!

:) Z

Can you explain me the build for gpu work in every windows? Also explain me what if you make update i will need to buy new build or you will give update of it? Any crypter which already work for it?

**kent9876** - August 17, 2018, 7:23 pm

(Aug 16, 2018 09:04 AM)Deflate Wrote: [\[CITE\]](#) Can you explain me the build for gpu work in every windows? Also explain me what if you make update i will need to buy new build or you will give update of it? Any crypter which already work for it?  
Hello Deflate,

Yes, GPU works on every system that physically has a GPU.  
When I make an update you just need to make a rebuild and spread new version of a miner, access to the builder is a lifetime.  
If some crypter will not work, you just need to PM me and we will make a deal with it together.

Thanks.

**rutsinsao** - September 9, 2018, 6:46 am

Hi.  
You included spreading methods ?

**kent9876** - September 9, 2018, 6:29 pm

(Sep 9, 2018 06:46 AM)rutsinsao Wrote: [\[CITE\]](#) Hi.  
You included spreading methods ?  
Nope

IDLE FEATURE PRESENTED!

- Added IDLE feature, now miner can detect when user(victim) is not using his machine and automatically change his usage(power). Now in the config file you need to set IDLE-power.

**Jdutchman121** - September 11, 2018, 12:37 am

does it hides from task manager?

**borito80** - September 11, 2018, 4:42 am

(Mar 23, 2018 08:13 PM)kent9876 Wrote: [\[CITE\]](#) - Drops on the disks, now NOTHING is dropping on the disk, all miners only containing in the memory. So, you just need to crypt only ONE file.(FILE-LESS MINING)I just have to encrypt a loader that will download the CPU and/or GPU miners and execute them in memory?

**divino2017** - September 12, 2018, 4:25 am

is this lifetime if i bought the cpu miner worth \$32 sir? and crypted too?

**78hack** - September 13, 2018, 7:43 am

I am interested in buying this product, how can I get in touch with you? I wrote you by telegram but I do not get an answer. Thank you

**Lunita\_** - September 13, 2018, 1:51 pm

Bought the product a few hours ago, still waiting for the delivery.  
I'm kinda excited to try it out, looks like a professional product.

Also PM'd you on TLG.

**Nyx** - September 13, 2018, 5:49 pm

Is the stub native? Or is it .net

**78hack** - September 14, 2018, 12:57 pm

hello very good, I'm interested in buying the silent miner. Can you see me by telegram please?

regards

**kelly52** - September 14, 2018, 8:44 pm

After payment, how long before you send the config kit. Looks like people are waiting a long time before receiving their package.

**psikrotic** - September 15, 2018, 7:47 am

been eyeing this for some time now

quick google search finds

[CPU+GPU][Builder] APOLLO MINER - Hidden Cryptonight miner - Nulled  
nulled(dot)to/topic/486335

when clicked url changes to  
/486335-no-longer-for-sale/

can't say for sure but I'll wait til the dev responds

**Vazum** - September 15, 2018, 8:13 am

I want to buy it, anyone know the detection rate?

@OP you will support the new fork ?

**78hack** - September 15, 2018, 8:41 am

I am going to buy the miner apollo right now, I will tell you what I think

**Vazum** - September 16, 2018, 9:42 am

I tried to contact you but failed, your telegram is like inactive you not answering.

I asked few questions but probably no answer.

Question 1) Would you make it FUD and what's the status of the detections now?

Question 2) Would you make a fork update to your miner because XMR will get forked at 18 oct.

Question 3) Would you release weekly updates to the miner?

**Meedman** - September 16, 2018, 10:15 am

(Sep 16, 2018 09:42 AM)Vazum Wrote: [\[CITE\]](#) I tried to contact you but failed, your telegram is like inactive you not answering.

BOT is now UP !

**78hack** - September 17, 2018, 11:12 am

I do not understand why he is not responding, he wrote to me 6 hours ago and he told me that everything worked correctly because I am also interested in buying it, although the truth that seen the seen is a bit suspicious.

**Vazum** - September 17, 2018, 3:33 pm

I saw his telegram status "Working on miner update" but i message him 3 days ago and still he didnt respond.

**Vazum** - September 19, 2018, 1:32 pm

I would like to buy it, so you can open a contract with me.

**omerta61** - September 20, 2018, 5:26 pm

can it be used to mine Zcash?

**Vazum** - September 21, 2018, 8:21 am

@OP ignores telegram also not answering here.

I open contract to buy his miner 2 days ago, no answer from his side.

**kent9876** - September 22, 2018, 6:53 am

BIG UPDATE PRESS-RELEASE

- Added GPU(NVIDIA) dynamic usage with this modes: 40% usage of GPU and 100%. Must-have feature I guess =)

- Added IDLE detection for GPU(NVIDIA). As everybody wanted this with previous update.

- Changed config format. Now it looks more better =)

- Added a thing where you can set reserve pool, wallet, pass... if config-file or site will not reponse, miner automatically starts mining on that reserve pool, wallet, pass.

- Added proxy wallet randomization

- Added FAQ(Step-By-Step) manual which explains how to make a build

Changing miner update system to incremental.

Current miner version is:

1.0.0.0

I apologize to everybody that I didn't respond for somebody. Was busy this term of time.

Second thing, I don't sell any products through the contracts. You have contacts in the first post of the thread, shoppy page, you have video of miner building...

If you really want to buy miner and you just need to make sure some little things - PM is opened.

For guys who just wasting my time - PM is closed.

Yes, access to the builder is LIFETIME!

Thank you.

**boykanyon123** - September 22, 2018, 11:57 pm

Purchased this via Shoppo.gg

Im on my 6hrs waiting for the activation. Got the invoice in my email, after fully payment i never got the confirmation or activation. Emailed shoppo already about it.

Will provide a feedback once tested.

**ronaldjohn9** - September 26, 2018, 7:38 am

i purchased this miner but telegram bot is not working plzz tell me what should i do

**kent9876** - September 27, 2018, 5:38 am

Change-log:

- Fixed bug with IDLE detection on x64 version of a miner
- Miner doesn't properly get time of IDLE
- Got miner totally tested. Everything works fine.
- Changed IDLE detection delay from 5 secs up to 1 min

Apollo Miner Ver. 1.0.0.1

Bought it, waiting for shopyy to confirm payment, after that i will write a review

**kent9876** - October 1, 2018, 8:11 am

Change-log:

- Fixed bug with GPU miner making

Apollo Ver. 1.0.0.2

Apollo Miner Change-Logs page: [CLICK](#)

**BoysWhoCry** - October 3, 2018, 1:22 pm

Is it still FUD? Or would we need to try and make it FUD ourselves

**Skyrim Modding** - October 4, 2018, 2:34 am

Can you just explain how does the GPU miner works? For Monero, does the client need CUDA installed or not? Is it universal GPU miner no matter of the manufacturer of the GPU?

**Mathian** - October 4, 2018, 3:55 am

The miner's generator includes binder and scan in checkmate?

**Chez\_Yuki** - October 5, 2018, 12:19 am

Hello,

Have you an example of the config file ? And the miner has an interface for the server or only the telegram bot ?

Thanks and have a good day !

**kent9876** - October 7, 2018, 10:37 am

Change-log:

- Added Xmrigr redownloading feature every N minute
- Added IPLogger request selection(Yes or No)

- Decreased time of building process, now builder gives builds within a minute
- "Fixed" that black window on Apollo startup
- Changed builder's messages
- Changed a few minor things within Apollo

—  
Apollo Ver. 1.0.1.0

**Jdutchman121** - October 21, 2018, 5:44 am

is it updated to latest fork?

**acronym64** - October 21, 2018, 1:17 pm

looks interesting how much did it cost

**Aim** - October 22, 2018, 6:02 pm

Might buy if OP confirms it works with the October 18 fork update

**abe9191** - October 23, 2018, 5:28 am

I can confirm it doesn't work, bought myself but the compile bot is dead

**kent9876** - October 24, 2018, 5:23 am

(Oct 23, 2018 05:28 AM)abe9191 Wrote: [\[CITE\]](#) I can confirm it doesn't work, bought myself but the compile bot is dead

First time hearing about you

**kent9876** - October 26, 2018, 9:13 am

Fixed:

- Fixed issues with xmrig2.8.3nvidia-notls.

Added:

- Added new option to GPU miner usage - "medium", it will use 80-85% of GPU power.

Deleted:

- Low GPU usage is no longer available. If you will set 'low' usage miner will automatically set it to 'medium'

Other:

Links to the pack of xmrigs:

Tested:

- Xmrige 2.8.3 with no-tls options, link to the tested xmrigs above
- GPU part. Investigated that if you are using 'low' usage miner won't receive any accepted shares.
- Miner crypting with Spartan Crypter. Miner will work with crypters only with SELF-INJECT. So you would need to find crypters which will inject our miner itself!!!!

"This caused cuz of self-copying routine, it can't find path for the miner

Tips:

- If you are mining on CPU with power more than 80%, GPU probably won't mine at all... Xmrige

trouble. Use 50% or 60% on CPU and GPU part will work fine. GPU part takes around 30% of CPU.  
- The most effective option for GPU is 'high', because it gives more H/S per 1% of GPU usage.

Apollo Ver. 1.1.0.0

**Skeetz** - October 28, 2018, 4:27 pm

Just bought this and the compile bot is dead. waiting on devs reply to my pm.

**LacazetteX** - October 29, 2018, 2:33 pm

Thank you.

**Evenso** - November 10, 2018, 2:40 am

Bought this product. Telegram bot builder is very useful because I can make builds anytime I want. What about the miner. It has a lot of unique features which I haven't seen before. Persistence is one of the best on the market, without special knowlage you won't be able to delete miner from your pc :) All xmrig files (including gpu) are executed in memory so you don't need to crypt them. Final size of build is about 250kb. By the way developer is very friendly and helps with any question you have. Finally updates are released every two weeks. In the conclusion I would recommend this hq product to everyone !

**kent9876** - November 10, 2018, 3:18 am

PMed

**TouchMe** - November 14, 2018, 12:14 am

Umm, can I get this without telegram, idc if u make my stubs or anything. but it's legit the most insecure shit

**GOoDMOoD** - November 14, 2018, 8:50 am

Everything solved, will review soon, thx kent

**Vazum** - November 14, 2018, 8:50 am

I'm totally disappointed of this Miner.

First i bought it at Sept 2018 and there was problems with the bot it was not working over 6 days. I contact owner he ignore my messages untill the day when bot comes back.

He replied to me that he was doing some maintance changes etc, but the other people in the chat was telling how it is bugged and rest things i ignore them.

I tested his miner after bot became online and i got complete build of it, the GPU version i had it was not working on any Windows 7/8/10 there was a kind of error showing on them all same error.

I contact RID he was making a stupid and funny of me, then i contact via his public group chat for apollo the guys was joking that it work bla bla they got 100-200-300kh and etc while there was other people who was

real and they said it not work it has same error they posted screenshots etc while the coder of this project ignore everything and said it works.

The final time come after 15 days when many people said same thing about the ERROR, he shutdown the bot for 7-8 days and was doing changes on it, probably some fix which everyone expect.

The days are gone and miner bot back online he post changes and that there are fix of that

problem, i was happy let say many of people who paid money to RID was happy.

Nothing happend, tested the build there was same error same problems, and new problems come out

New problems?

- 1) Blackscreen show up on every runing. (10-20 sec)
- 2) Same error still appear, and give the same crash message every time when you run the Windows.

I contact RID again he again was same person and showing disrespect on me and many others who was facing the same issue with his miner.

I explain him that this is serious problem and 1 month is gone from the product which still not work.

Oct come and same problems still facing while RID was inactive and other people was making funny of everything in his int chat, there some people who violance and religion and everything in the chat while RID just ban them for 1min and unmute and leave them, trollers (people probably with no life). But problems continue with his miner time by time, the fork was need to come in 4-5 days before he shutdown bot and making updates changes and etc. When bot finnaly come back after couple of days and fork come, there was again problems with new features like "Redownload" "Idle time" "Crypted" it was never FUD always was 100% deteted, if you crypt it it will never work. Day comes and changes are done, but miner still loosing connections and getting black screen and some problems etc..

3 month almost and nothing happening with this miner, now RID is selling acc to his source and spam other project VIDAS Steller. He do some updates and new TOS if you say something about miner you get banned. Today a guy just bought his product, got banned because he asked something what he didnt understand. He was talking turth because the FAQ use old version and also there some words that will make you confused. Like in config.txt there was if you set proxy to false it will randomize your wallet, while was negative because it was wrong. The proxy = false dont randomize your wallet it work good with proxy, if you set to true it randomize wallet. So imagine the tutorial and videos (some of them are on russian). When someone ask you, you should respect he paid you money 35-65\$ are not low money, you need to help him not disrespect and make funny with your other friends.

Just to add i tested over 2000 bots, and my friends test it they do all tests some of them are here on HF they will repply on this thread, they do tests with more bots same thing happend.

Remember this there three persons they changed name maybe 40 times and wrote good about this miner, troll you everytime and wrote that they got 500kh or 300kh from it these same guys use bad words to every customer while RID dont care he enjoy with it. Probably i waste money on this project but good luck with it from today and next days, people deserve to know truth, there 10+ people who pming me everyday about this problem and trying to find solution.

Here are some screenshots:

He banned me and new customer (Here are screenshots):

<https://imgur.com/JIC5KhB>  
<https://imgur.com/H5muCNh>  
<https://imgur.com/dM2GeKH>

I keep full conversation with him, while on the chat with other customers it was pruned many times by him.

There are some russian members in the group which are admins and some people which are fake persons probably RID other accounts or his friends, they always say that miner work and when there was problems they always say shits and make fun of everyone who say the truth and show the problems of the miner they make you funny and enjoy, while RID is same person he send smiles funny gifs and making LOL LOL bla bla, that show his real ages and guy behind this project. Kid with no respect of his customers, probably take money and dont care. He banned me from chat because i defend a new customer. Probably you can see on what kind of project we are talking about.

Enjoy, RID. Money will not make you famous, dirty money will back you to that what you are before.

**kent9876** - November 14, 2018, 6:26 pm

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) First i bought it at Sept 2018 and there was problems with the bot it was not working over 6 days. I contact owner he ignore my messages untill the day when bot comes back.

He replied to me that he was doing some maintance changes etc, but the other people in the chat was telling how it is bugged and rest things i ignore them. Yes, it wasn't working because of maintenance, I've made changes and pushed out an update. Yes, updating process was lasting for 6 days.

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) I tested his miner after bot became online and i got complete build of it, the GPU version i had it was not working on any Windows 7/8/10 there was a kind of error showing on them all same error.

Those guys 4real has that rate, and with their traffic that 'long-life' error didn't make any sense, cuz their slaves are REAL, and their PCs can be rebooted so that error didn't appear on a big term of time for them.

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) The final time come after 15 days when many people said same thing about the ERROR, he shutdown the bot for 7-8 days and was doing changes on it, probably some fix which everyone expect.

Nothing happend, tested the build there was same error same problems, and new problems come out Yes, when I investigated that that error come on the INTERNET connection - I fix that. Also, I fixed the error on downloading mining part when ISP or the INTERNET connection of your slave is gone.

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) New problems?

1) Blackscreen show up on every runing. (10-20 sec)  
2) Same error still appear, and give the same crash message every time when you run the Windows. New problems were appearing, yes, but when I asked you for an access to that bot, where the issue was causing an error - you just ignored me =)  
Also, those errors were appearing only on a small % of PCs =)

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) I contact RID again he again was same person and showing disrespect on me and many others who was facing the same issue with his miner.

I explain him that this is serious problem and 1 month is gone from the product which still not work. Where I made a disrespect on you? Maybe that I banned those users just for a week, which trolled your person?

Yes, this issue was really disappointing, and I already fix that with version 1.1.1.0 and totally disappeared in 1.1.1.1.

So what exactly I did wrong? Made Apollo and left it alive at it is?

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) Oct come and same problems still facing while RID was inactive and other people was making funny of everything in his int chat, there some people who violance and religion and everything in the chat while RID just ban them for 1min and unmute and leave them, trollers (people probably with no life). Day comes and changes are done, but miner still loosing connections and getting black screen and some problems etc..

Prove of that I banned them just for 1 minute, I can give you a prove that I banned them for a week, for a day and at the end forever. Also, I made a chat without any restrictions, where you can do anything as you want, and there, yes, those guys have trolled you =)

Mining part was excellently working with previous versions of a miner. Also, I did tests and some time ago I gave tested part of it.

Native soft will never be totally FUD, or you will start paying for it monthly, or it will has over-price. So you needed to crypt it, yes, my fault was in cryptoability of a miner. And yes, it was fixed, now miner is totally cryptoable for a native crypter with a SELF-INJECTION feature.

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) 3 month almost and nothing happening with this miner, now RID is selling acc to his source and spam other project VIDAS Steller. He do some

When someone ask you, you should respect he paid you money 35-65\$ are not low money, you need to help him not disrespect and make funny with your other friends. Miner is alive, and his life is a big adventure =). I started selling an access to the source code of a project, cuz Apollo at the stage of it. VIDAS Stealer, yes, it's a beautiful stealer that I can't start selling on this forum. New TOS arrived same as new thread design, I just made TOS to make miner greater, and exactly I'm trying to prevent leaking on VT from users, so I mentioned it in the chat. I can't deny the license without explanations for users who already have my miner, this rule only targets new users.

Yesterday a guy, and you started talking that I somewhere disrespected him, in two messages, lmao. I banned you, and then have a talki with that guy, he didn't give me any proof of my violence, just smth like: "you behave like an asshole, but you are not wrong", and there were no proves of my VIOLENCE or that ASSHOLE statement. I just an asshole without any proves or messages that can threat smb. (THIS IS AMERICA..)

Just imagine that there is a postfix on those videos: "(OLD)", do you know what does it mean?

Maybe that those videos are old?

And maybe they can show only PREVIOUS generations of a miner?

Maybe you would better follow the LAST video in that list?

And follow instructions within a bot when he sends you an example? Maybe I need to rent smb to drive to your PC and exactly tell what to do?

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) Just to add i tested over 2000 bots, and my friends test it they do all tests some of them are here on HF they will reply on this thread, they do tests with more bots same thing happend.Waiting for your guys, installers xD.

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) Remember this there three persons they changed name maybe 40 times and wrote good about this miner, troll you everytime and wrote that they got 500kh or 300kh from it these same guys use bad words to every customer while RID dont care he enjoy with it. Probably i waste money on this project but good luck with it from today and next days, people deserve to know truth, there 10+ people who pming me everyday about this problem and trying to find solution.I'm not responsible for users that buying my product, and I don't read EVERY message in the chat if you been really disrespected by someone - just PM me with proves and I will make a decision on his soul in the chat.

Those guys really have that H/S, what I'm supposed to do? Catch their H/S for you?

Lol, but why they are PMin you? Why not me? Why they didn't open a dispute or smth???

I don't receive any messages about ANY issue since last update, pretty interesting if this is a truth, waiting for proves.

(Nov 14, 2018 09:50 AM)Vazum Wrote: [\[CITE\]](#) I keep full conversation with him, while on the chat with other customers it was pruned many times by him.

Yes, this issue was really disappointing, and I already fix that with version 1.1.1.0 and totally disappeared in 1.1.1.1.

So what exactly I did wrong? Made Apollo and left it alive at it is?

Prove of that I banned them just for 1 minute, I can give you a prove that I banned them for a week, for a day and at the end forever. Also, I made a chat without any restrictions, where you can do anything as you want, and there, yes, those guys have trolled you =)

Mining part was excellently working with previous versions of a miner. Also, I did tests and some time ago I gave tested part of it.

Native soft will never be totally FUD, or you will start paying for it monthly, or it will has over-price. So you needed to crypt it, yes, my fault was in cryptoability of a miner. And yes, it was fixed, now miner is totally cryptoable for a native crypter with a SELF-INJECTION feature.

Miner is alive, and his life is a big adventure =). I started selling an access to the source code of a project, cuz Apollo at the stage of it. VIDAS Stealer, yes, it's a beautiful stealer that I can't start selling on this forum. New TOS arrived same as new thread design, I just made TOS to make miner greater, and exactly I'm trying to prevent leaking on VT from users, so I mentioned it in the chat. I can't deny the license without explanations for users who already have my miner, this rule only targets new users.

Yesterday a guy, and you started talking that I somewhere disrespected him, in two messages, Imao. I banned you, and then have a talki with that guy, he didn't give me any proof of my violence, just smth like: "you behave like an asshole, but you are not wrong", and there were no proves of my VIOLENCE or that ASSHOLE statement. I just an asshole without any proves or messages that can threat smb. (THIS IS AMERICA..)

Just imagine that there is a postfix on those videos: "(OLD)", do you know what does it mean?

Maybe that those videos are old?

And maybe they can show only PREVIOUS generations of a miner?

Maybe you would better follow the LAST video in that list?

And follow instructions within a bot when he sends you an example? Maybe I need to rent smb to drive to your PC and exactly tell what to do?

Waiting for your guys, installers xD.

I'm not responsible for users that buying my product, and I don't read EVERY message in the chat if you been really disrespected by someone - just PM me with proves and I will make a decision on his soul in the chat.

Those guys really have that H/S, what I'm supposed to do? Catch their H/S for you?

Lol, but why they are PMin you? Why not me? Why they didn't open a dispute or smth???

I don't receive any messages about ANY issue since last update, pretty interesting if this is a truth, waiting for proves.

Yes, there are some Russian guys from the chat, they are admins cuz I'm a Russian, lol. Maybe they always say that miner works just because it works? - I guess this is too complicated this for ya..

Yeah, there are some users that can make a fun in the chat =) But you are too vulnerable for this chat and another chat without restrictions. I assume that just smb threat you and you became in a rage-mode of it.

--

At the end, I can only say that you just a kid, or a 'BIG' kid who doesn't get any normal message as a normal message. Seems like you just have been threatened of smb and you became 'really-really' dangerous 'reverse'(in software) guy. Waiting for your next message to just again ask you this: "Where are proves, Johny?"

I'm out of comments, proves are on the screenshots kid. Because im not a "KID" also you again use disrespect people who paid you money, just new future buyers will read your answers and find out what kind of person you are, and what kind of product do you sell. About the guys which you said i banned them 1 day and you want proove of chat which you pruned 10x times, and those guys changed their usernames + names and you invite them again and they started trolling under different name like the guy with hitler stuff and that shit. People tell you alot times about problems but you ignore them.

My prediction abilities were on 146% with the last message :DDD

Same no proves there, only words with basic rage-mode on smb who trolled your person... That's why you are out of comments.

So, your main reason in writing that review is just to mention there how you feel after some chatting with other people. Everything about that I wrote with the previous message, just PM me and give me a proof, then I will make a choice on his soul.

**itexpert** - November 16, 2018, 2:22 am

so i see drama here,anyway does this still work?

**kent9876** - November 16, 2018, 5:44 am

Show proof that GPU version work in Windows 7 64bit, while it work more than 1 day. Offcourse you cant proof that.

**Deflate** - November 17, 2018, 2:05 am

I do tests to this miner 6 days ago, tested 14 i7/i3 processors, eight of them was using GTX 1060 TI, while they was mining around 3 hours after that they crashed. This is another public miner with no

success story. I'm glad i didnt waste my money in this product.

How long are you using this miner?

CPU + GPU or just one of them?

(Nov 17, 2018 03:05 AM)Deflate Wrote: [\[CITE\]](#) I do tests to this miner 6 days ago, tested 14 i7/i3 processors, eight of them was using GTX 1060 TI, while they was mining around 3 hours after that they crashed. Strong statement, maybe we can see the prooves?  
Maybe we can see proves that this is also public miner?

Also maybe you would better unrate me?

**kent9876** - November 23, 2018, 1:07 am

Thanks for everybody for being with this project. The project is going to close because of insufficient funds to support it.

Maybe in the future Apollo come-back, but not now.

Thanks for everybody. Thanks for guys who did smth for this project.

The bot will be shut down from now. Github where probably I will mention sources:
