Fun site tbh, glad you added faucet, so you don't have to spend put any real money at the start.

Great game, great community in chat as well. I will say, more "Connection Lost" flags than I feel something handling money should have though.. I got screwed pretty hard on this (not requesting funds, just reporting a bug!)

Hi,

This usually happens when there is a bad connection with the server. It is best to use the "Auto cash-out" feature.

Please check your PM.

Thank you!

Just to provide an update. Phun was very generous in "making it right" based on bugged losses (even though its a gamble, so right is right regardless to me), and remains very diligent on investigating these little issues!

As he mentions in FAQ, use the Auto-Cashout if you're going for a certain mark to avoid these issues, but if you're playing fully manual, just be careful. Its very rare, but sometimes little quirks do happen. Just as you wouldn't press Ctrl C just once, don't ever click just once, spam that shit to be

sure. ;)
