so are you using an account cracker with a config to get rdp? also if you only gotten 13 so far and
an avg sell price of 1.50 that would mean you still need 87 rdp to make your money back. can you
keep us updated on how many until you get to 100.

i was going to purchase but this is crazy amount of money for a config and tool if that is the case.

That is an impossible question to answer. Depends on what coin your mining, how powerful the RDP's are that you get and how many you have running your miner simultaneously.

Big vouch for this guy, knows what he's doing. I was a complete noob at these things and he walked me through everything!

DI?E - April 11, 2018, 11:17 am

Got the method last night. OP was very cool. He didn't have to teach me much as I know how it's done. Nevertheless he will help you out and continue to answer questions. Transaction went smooth. I would say good luck with sales but I would prefer the method only gets limited buys lol. I can easily grab a few hundred RDP'S a day. Thanks!

I got some questions and Im really intrested in this.

Can this be automated or is this manual work?

I read somewhere you got rdps last for 1 month. But in avrage how long will they last? I understand it is all different from each rdp but in General IF I get 50 rdps. Will you in avrage have more then 20 still working after 4-5 days?

Also I took a look at some of the IPs from posted screenshots here and looked them up on shodan and they are Microsoft azure and some other cloud based Vps servers. So thats why I asks IF this can be automated beceuse if it's cloud based I understand if they gets removed quickly.

Thanks in advance.

Must say I was surprised how the method actually works and when you think about it, it's really smart and something not many even think of.

I think that in this situation, it's not the knowledge you pay for but instead the very idea that is the gold here.

If you have some knowledge in the field, this is really easy to scale up and therefore I would like to say to OP that this may be overused if OP continues to sell this to let say more than 10 more.

At least very pleased with everything and have so far picked up about 60 RDPs and then only under my own test to tweak this to my own version and I'm sure I'll be able to find significantly more than 200/day when I'm done.

So to people who think about buying, I just say, Buy now while you can.

Then the guide itself was nice, OP wanted to show everything live over TV and go through step by step and explain how it works. I liked that way to learn, the only thing I think is that it had made it easier for some people if they might get some list of steps to follow if people are not used to working in a terminal environment.

Easily worth \$250

Update 2018-04-17: Today I got 122 RDPs ?

No one ever said anything about cracking or brute forcing. No one's said what the method is at all, so stop trying to get at it

michaas - May 6, 2018, 5:00 pm

This method does not actually involve brute forcing logins. It is a smart way of getting RDPs.

The process is actually automated once its all setup. I don't want to spoil much , to be honest its actually quite an intelligent way of getting RDPs if you try to think of it.

The first day of setup I only got around 3 RDPs the next day I got around 10. Its scalable if you can tweak a little on your own.

Here's the RDP specs I got so far. Includes i3 & i5 SPECS.

Most of all , Thanks for being patience with me while my connection is slow and causes laggyness of the TV session and the VPS.

Vouch for Abou Wadi3! Nice & Patience Guy!

Edit:

I got one with a good internet speed.

Any update from customer ?

OP say can get 80-100 per day but #134 only get 3 for firsst day, and around 10 in next day. So why it very slow for this guys ?

This tut run on VPS or main PC ?

If run on VPS, can i use x10 VPS for get more RDPs ? (1VPS = ~80-100 per day, so 10 VPS = ~800-1000 per day) ?
