Thread: [Cleaning C drive](#)

**icy?** - March 25, 2018, 6:06 pm

How can I completely wipe my hard drives? I just want my drivers and OS. I'm running Windows 7

**WatermelonHaze** - March 25, 2018, 6:08 pm

Get a windows 7 disc and boot from it, wipe the drive reformat it and reinstall windows, do all your updates and drivers.

Just a note if you had Windows 10 you wouldn't have to go through the process of reinstalling the entire OS since there is a built in refresh tool.

Try deleting your system32 folder. Works everytime

**michaelscofield2018** - April 4, 2018, 8:24 am

Hey I am not clear your post at all. Firstly start your pc using linux mint. Make a backup of your drivers and then set up win 7 once again. Make two os pendrive bootable.

Thanks.
