Thread: [How to make extra money daily \(FREE METHOD HERE NO DOWNLOAD REQUIRED\)](#)

packofmidgets - March 25, 2018, 9:28 pm

Okay so I figured I would try my best to help some of you out who want to make money easy online daily.

So to start I will just be going over a personal method I used myself about a month ago just to get some easy quick funds coming in.

Everyone I am sure has heard of the "Buy Low Sell High" strategy. And that is what we will be using here.

First what you need to do is to find a product. I will be using Shell Gas Codes for the example since it still can be used and it is proven to work.

I want to state now that no matter what always be cautious because buying directly from someone online will ALWAYS be a risk.

So with that said I was searching for about an hour or two for products being sold on popular sites such as HF. (Will not name others on here sorry)

I went through and studied the legit vouchers, which would be the "I purchased this" vouchers, and I found shell gas codes being sold for \$11-\$18.

The best part I seen was that, in the sellers thread was that, he got new codes in daily. I also noticed he sold out within a few hours every day.

With that information it was easy for me to see that this was a HOT product.

Once you find a good product then it is easy to do the rest. All you have to do is one of two things:

1ST thing you can do is buy the product yourself (you can even try to get a discount by messaging the seller) You never know!

2ND thing you can do is offer it for sale or find a buyer pre ordering it. Now with this one you have to make sure you are allowed to do this on the site you are going to be reselling it on. Or risk being banned or something. Also this is risky because if the seller sells out before you actually make the purchase then you are stuck giving refunds or worse. I suggest doing the 1ST one. You can however try to make a deal with the seller to become a verified reseller. (You never know!)

So lets just do like I did and say you chose 1ST choice. Now buy as many codes as you can while he has some in stock.

As soon as you see him out of stock (or even before up to you) You can post your sales as in stock for a higher price. If the product is HOT and you do not try to gouge the price then you will have no problems making money from reselling.

Now take this method and apply it to something else. Lets say xbox codes. go buy a 1 month code

for \$3-\$4. The resell for \$5-\$6. (obviously you can get higher codes or whatever and make more)

I hope this will help some of you out with how to earn money the old fashioned way. It is a VERY public method that a lot of users here use to this day.

Enjoy the free money guys!

I guess that's possible. just if you're on HF and you start reselling from some dude on HF on HF he's gonna get mad lmao.

That is true but also why I say I personally waited until the seller was out of stock before I sold any. That is just me though and it is always best to try to reach out to the original seller before doing any selling. =)

thanks for the info, I'm gonna try to make some extra money online without risking my everyday money but this seems like a good idea after having banking some capital.

If you find a good product you will make easy money from it. You can also see about proxy selling though that is a little dangerous.
